Resilience Development Global Change Katrina:

Resilience, Development and Global Change Katrina Brown, 2015-12-14 Resilience is currently infusing policy debates and public discourses widely promoted as a normative goal in fields as diverse as the economy national security personal development and well being Resilience thinking provides a framework for understanding dynamics of complex inter connected social ecological and economic systems The book critically analyzes the multiple meanings and applications of resilience ideas in contemporary society and to suggests where how and why resilience might cause us to re think global change and development and how this new approach might be operationalized The book shows how current policy discourses on resilience promote business as usual rather than radical responses to change But it argues that resilience can help understand and respond to the challenges of the contemporary age These challenges are characterized by high uncertainty globalized and interconnected systems increasing disparities and limited choices Resilience thinking can overturn orthodox approaches to international development dominated by modernization aid dependency and a focus on economic growth and to global environmental change characterized by technocratic approaches market environmentalism and commoditization of ecosystem services Resilience Development and Global Change presents a sophisticated theoretically informed synthesis of resilience thinking across disciplines It applies resilience ideas specifically to international development and relates resilience to core theories in development and shows how a radical resilience based approach to development might transform responses to climate change to the dilemmas of managing forests and ecosystems and to rural and urban poverty in the developing world The book provides fresh perspectives for scholars of international development environmental studies and geography and add new dimensions for those studying broader fields of ecology and society Research Handbook on Disasters and International Law Marie Aronsson-Storrier, Susan C. Breau, 2024-09-06 This thoroughly revised second edition investigates the role of international law in preventing preparing for and responding to both sudden and slow onset disasters With both revised and entirely new chapters this Research Handbook explores international law in light of significant contemporary global challenges and developments in theory law and practice **Unnatural Disasters** Gonzalo Lizarralde, 2021-08-10 Storms floods fires tsunamis earthquakes tornadoes and other disasters seem not only more frequent but also closer to home As the world faces this onslaught we have placed our faith in sustainable development which promises that we can survive and even thrive in the face of climate change and other risks Yet while claiming to go green we have instead created new risks continued to degrade nature and failed to halt global warming Unnatural Disasters offers a new perspective on our most pressing environmental and social challenges revealing the gaps between abstract concepts like sustainability resilience and innovation and the real world experiences of people living at risk Gonzalo Lizarralde explains how the causes of disasters are not natural but all too human inequality segregation marginalization colonialism neoliberalism racism and unrestrained capitalism He tells the stories of Latin American migrants Haitian earthquake

survivors Canadian climate activists African slum dwellers and other people resisting social and environmental injustices around the world Lizarralde shows that most reconstruction and risk reduction efforts exacerbate social inequalities Some responses do produce meaningful changes but they are rarely the ones powerful leaders have in mind This book reveals how disasters have become both the causes and consequences of today s most urgent challenges and proposes achievable solutions to save a planet at risk emphasizing the power citizens hold to change the current state of affairs

Art and Activism in the Age of Systemic Crisis Eliza Steinbock, Bram Ieven, Marijke de Valck, 2020-10-07 This book examines how renewed forms of artistic activism were developed in the wake of the neoliberal repression since the 1980s The volume shows the diverse ways in which artists have sought to confront systemic crises around the globe searching for new and enduring forms of building communities and reimagining the political horizon The authors engage in a dialogue with these artistic efforts and their histories in particular the earlier artistic activism that was developed during the civil rights era in the 1960s and 70s providing valuable historical insight and new conceptual reflection on the future of aesthetic resilience This book will be of interest to scholars in contemporary art history of art film and literary studies protest movements and social movements

Improving the Sustainable Development Goals Lars Niklasson, 2019-04-12 Improving the Sustainable Development Goals evaluates the Global Goals Agenda 2030 by looking at their design and how they relate to theories of economic development Adopted unanimously by the member states of the United Nations UN in 2015 the goals are remarkable for the global commitment on a set of targets to reach by 2030 but also for the lack of a strategy of implementation The choice of appropriate action is handed over to individual governments some of which are limited by their lack of resources This book explores how implementation of the sustainable development goals SDGs can be developed especially in developing countries The content strengths and weaknesses of the SDGs are critically examined alongside their relationship to ongoing academic research The authors also investigate the actions of governments over the past three years by looking at the national strategies they have presented at annual meetings of the UN High Level Political Forum Improving the Sustainable Development Goals takes a critical but constructive approach pointing out risks as well as possible remedies The SDGs are seen as an opportunity for a global conversation on what works in solving some fundamental problems relating to poverty and environmental degradation With the inclusion of a chapter by Tobias Ogweno former member of the Kenya s UN mission this book will appeal to all those who are interested in policy analysis with a focus on development issues

The Future of Sustainability Education at North American Universities Naomi Krogman, 2023-02-10 This collection explores sustainability education in the North American academy The authors advocate for a more integrated approach to teaching sustainability in order to help students address the most pressing problems of the world embrace experimentation and foster more meaningful involvement with the communities in which universities are located Throughout they remain focussed on identifying opportunities for sustainability in higher education and suggesting specific strategies and tactics to

achieve them Recommendations include pedagogical and structural changes aimed at helping students understand the systems in which they can advance sustainability This timely volume will be of interest to scholars academic leaders policy makers societal partners in research and private sector leaders interested in advancing the sustainability agenda Foreword by Thomas E Lovejoy Contributors Apryl Bergstrom Christopher G Boone Ann Dale Thomas Dietz Roger Epp Allison F W Goebel Kourosh Houshmand Robert H Jones Naomi Krogman Shirley M Malcom Robert E Megginson Patricia E Ellie Perkins Vicky J Sharpe Toddi A Steelman

Climate Change Public Expenditure and Institutional Review Sourcebook (CCPEIR) Adrian Fozzard, This Climate Change Public Expenditure and Institutional Review Sourcebook CCPEIR seeks to provide practitioners with the tools and information needed to respond to the public expenditure policy and management challenges arising from climate change It is a series of notes and supporting materials written as a first step towards consolidating current research and international experience identifying emerging practice and providing practical and applicable guidance for staff of central finance agencies development agencies environmental agencies and other international organizations working on climate change issues In addition to emphasizing the importance of strengthening national systems throughout the Sourcebook focuses on the specific public expenditure policy and management challenges posed by climate change such as decision making in the face of uncertain future climate conditions expenditure planning for extreme weather and climate events the lack of agreed budget definition and classification of climate change activities

Navigating Uncertainty Ian Scoones,2024-07-24 Uncertainties are everywhere Whether it s climate change financial volatility pandemic outbreaks or new technologies we don t know what the future will hold For many contemporary challenges navigating uncertainty where we cannot predict what may happen is essential and as the book explores this is much more than just managing risk But how is this done and what can we learn from different contexts about responding to and living with uncertainty Indeed what might it mean to live from uncertainty Drawing on experiences from across the world the chapters in this book explore finance and banking technology regulation critical infrastructures pandemics natural disasters and climate change Each chapter contrasts an approach centred on risk and control where we assume we know about and can manage the future with one that is more flexible responding to uncertainty The book argues that we need to adjust our modernist controlling view and to develop new approaches including some reclaimed and adapted from previous times or different cultures This requires a radical rethinking of policies institutions and practices for successfully navigating uncertainties in an increasingly turbulent world

Security Beyond the State Claudia Morsut,Daniela Irrera,2018-06-11 Which is the role of the European Union in dealing with crises that go beyond the nation states borders terrorism proliferation of weapons of mass destruction regional conflicts state failure organised crime natural and man made disasters The authors assess the main challenge for the EU the need to operate in a multidimensional setting

where with a wide range of actors such as member states national and international NGOs international organisations NATO and the UN in primis as well as a wide range of activities rules and norms are generated for these diversified crises
