Resting On The Future Catholic Theology For An Unfinished Universe:

Resting on the Future John F. Haught, 2015-09-24 Science has now demonstrated without a doubt that we live in an unfinished universe Discoveries in geology biology cosmology and other fields of scientific inquiry have shown that the cosmos has a narrative character and that the story is far from over The sense of a universe that is still coming into being provides a fertile new framework for thinking about the relationship of faith to science John F Haught argues that if we take seriously the fact that the universe is a drama still unfolding we can think new thoughts about God and indeed about all the perennial themes of theology Science's recent realization that the universe is dramatic however has yet to penetrate deeply into either spiritual or intellectual life Most Christian thought and spirituality still presuppose an essentially static universe while influential academic and intellectual culture remains stuck in a stagnant materialist naturalism and cosmic pessimism *Resting on the Future* asks about the meaning of an unfinished universe from the point of view of both Christian theology and contemporary intellectual life Each chapter covers a distinct aspect of what Haught takes to be an essential transition to a new age in Catholic life and thought Biology cosmology and other fields of science now provide the setting for a wholesome transformation of Catholic thought from a still predominantly pre scientific to a more hopeful and scientifically informed vision of God humanity and the natural world

The Future of Catholic Biblical Interpretation James B. Prothro, Isaac Augustine Morales, 2024-09-10 Notable Catholic interpreters of Scripture discern the guiding values of biblical interpretation at the brink of a new era for the church Under the influence of Benedict XVI and Francis Roman Catholics whether lay or religious have found renewed interest in studying sacred Scripture Yet the church has also grown and faces new challenges in the new millennium What does the future of Catholic biblical interpretation look like And how ought the church's rich heritage of biblical interpretation continue to influence it This volume collects essays by some of the most influential voices in Catholic biblical scholarship today Covering a variety of topics from the Old Testament to the New Testament and biblical theology the essays are united by a common goal to hear the word of God and proclaim and apply it within the church The authors pay special tribute to Marie Joseph Lagrange This nineteenth century French Dominican led the way in blending critical methodology with respect for the Church's authority in order to put scriptural study in service to the good of souls Featuring diverse and authentically Catholic perspectives *The Future of Catholic Biblical Interpretation* represents fresh purpose and direction for the church's long and fruitful tradition of exegesis

Divine Radiance in Human Evolution O'Murchu, Diarmuid, 2025-05-28 *The God of Chance and Purpose* Bradford McCall, 2022-02-10 This brief title will pursue a triangulation of chance divine involvement and theology through a fundamentally Peircean lens at least epistemologically and semiotically The argument proceeds over five distinct chapters and a conclusion that constitutes a sixth chapter In Part I I discuss the Modern Synthetic theory in evolutionary biology In particular I refer to what I have labeled the secular evolutionary worldview SEW Also in Part I I dismiss the French physicist Pierre Simon de Laplace's claim that a sufficiently

informed intelligence could forecast everything that is going to happen in the whole universe and working backwards tell you everything that did happen not by direct citation and rebuke but rather by implicit argumentation and demonstration of the God of Chance In Part II of this book I explore the God of chance and purpose with theological assists provided by Philip Clayton and Alister McGrath over two chapters So then we live in a world of both chance and purpose One may even go so far as to state that this world is designed for both chance and purpose *Thomas Aquinas and Teilhard de Chardin* Donald J. Goergen OP, 2022-10-21 In an increasingly divided and secularized world in an age of unbelief we yearn for increased unity for a sense of the transcendent for a humanism that does not force one to choose between God and the world This humanism requires an integration of ancient wisdom with modern learning or one might say faith and reason religion and science Christology and cosmology As the Gospel of Matthew puts it the sage goes into the storehouse to bring out both something old and something new To this Christian humanism both Thomas Aquinas and Pierre Teilhard de Chardin have significant contributions to make One is not forced to choose between them but rather to see in these two visionaries one medieval one modern complementary insights One philosophically precise the other scientifically trained they challenge us to look again at our search for wholeness for holiness Can we see something of what they saw Can we seek something of what they sought

Ecotheology Kiara Jorgenson, Alan G. Padgett, 2020-09-24 Just as God loves creation so are Christians called to care for it Now amid the accelerating degradation of our global environment that task has taken on greater urgency than ever How should Christians respond to the climate crisis and widespread pollution of earth's shared commons water and air How might Christian communities think about human responsibility to other living creatures In roundtable format Richard Bauckham Cynthia Moe Lobeda Steven Bouma Prediger and John F. Haught navigate the layers of what it means for humans to live in right relationship with earth's lifecosystems After each contributor's essay the other three contributors issue a response including points of disagreement and questions thereby modeling for readers productive and respectful dialogue The ecumenical conversations in Ecotheology represent the diverse viewpoints of contributors theological and practical commitments exploring creation care through a variety of frameworks including natural science biblical studies systematic theology and Christian ethics **The New Cosmic Story** John F. Haught, 2017-10-24 A Choice Outstanding Academic Title A compelling argument for a broader understanding of religion in relation to our cosmic story Mary Evelyn Tucker coauthor of *Journey of the Universe* Over the past two centuries scientific advances have made it clear that the universe is a story still unfolding In this thought provoking book John F. Haught considers the deeper implications of this discovery He contends that many others who have written books on life and the universe including Stephen Hawking Stephen Jay Gould and Richard Dawkins have overlooked a crucial aspect of cosmic history the drama of life's awakening to interiority and religious awareness Science may illuminate the outside story of the universe but a full telling of the cosmic story cannot ignore the inside development that interiority represents Haught addresses two primary questions what does the arrival of religion tell

us about the universe and what does our understanding of the cosmos as an unfinished drama tell us about religion The history of religion may be ambiguous and sometimes even barbarous he asserts but its role in the story of cosmic emergence and awakening must be taken into account A well written book overall and one that should prompt a more inspiring view of where we are in the Big Picture The New Cosmic Story is highly recommended Forbes com Haught delivers a singular contribution with his fresh panoptic perspective on our cosmic story Charles G Conway Reading Religion This book John F Haught s summa will become a permanent contribution to the religion and science literature Holmes Rolston III Templeton Prize winner Thomas Aquinas and Teilhard de Chardin Donald J. Goergen,2022-10-21 In an increasingly divided and secularized world in an age of unbelief we yearn for increased unity for a sense of the transcendent for a humanism that does not force one to choose between God and the world This humanism requires an integration of ancient wisdom with modern learning or one might say faith and reason religion and science Christology and cosmology As the Gospel of Matthew puts it the sage goes into the storehouse to bring out both something old and something new To this Christian humanism both Thomas Aquinas and Pierre Teilhard de Chardin have significant contributions to make One is not forced to choose between them but rather to see in these two visionaries one medieval one modern complementary insights One philosophically precise the other scientifically trained they challenge us to look again at our search for wholeness for holiness Can we see something of what they saw Can we seek something of what they sought **All God's Animals** Christopher Steck,2019-10-01 The book is the first of its kind to draw together in conversation the views of the early Church contemporary biblical and theological scholarship and post conciliar teachings Steck develops a comprehensive Catholic theology of animals based on an in depth exploration of Catholicism s fundamental doctrines trinitarian theology Christology pneumatology eschatology and soteriology All God s Animals makes two central claims First we can hope that God will include animals of the present age in the kingdom inaugurated by Christ Second because of this inclusion our responses to animals should be guided by the values of the kingdom As Christians await the final liberation of all creation they are to be witnesses to God s kingdom by embodying its ideals in their relations with animal life Because the kingdom s fullness is yet to come and because our world remains marked by the wounds of sin however Christian treatment of animals will at times require acts that are at odds with the kingdom s ideals for example those causing suffering and death Steck examines each of these ideas and explores all of their complexities God After Einstein John F. Haught,2022-01-01 A leading theologian presents a hopeful account of the universe after Einstein exploring it as a meaningful drama of awakening This book is a deep and provocative piece of theology that proposes we engage with the universe as a kind of narrative of awakening and unfolding as well as an important and useful approach for thinking about theology with respect to modern cosmology Matthew Stanley New York University Before the early twentieth century scientists and theologians knew almost nothing about time s enormity and the corresponding immensity of space But now after Einstein cosmology offers theology a whole new way of looking at the

ageless questions about matter time God cosmic purpose and the significance of our lives The universe need not be thought of as simply an endless reshuffling of lifeless and mindless atoms in a pointless series of moments Rather the universe is a temporal drama of awakening whose meaning can be revealed only gradually by looking in a spirit of anticipation and hope toward the horizon of the cosmic future In conversation with Einstein s ideas and opinions John F Haught develops here a new cosmological understanding of the meaning of God time eternity mystery life thought freedom and faith In doing so he offers readers a new way of understanding the relationship of science to theology
