Citation Management Tools Nancy R.

Glassman, 2018-11-23 With the rise of scholarly communication proper citation and attribution practices have become more important than ever. Citation management software is an essential tool for meeting this challenge. Look no further than the proliferation of free and fee based packages on the market: new programs and updated versions of existing software offering innovative features seem to pop up all the time. Busy students and researchers do not have the time or energy to test drive all the available options in order to make an informed decision regarding the selection of the right tool to manage their references. After finding the right tool they need someone to help them use it properly. Librarians must be able to help their patrons navigate the many alternatives and effectively use the special features of the software they ultimately select. Citation Management Tools: A Practical Guide for Librarians was written to help librarians, teachers and writers demystify the complex world of citation management software. Topics include: An overview of citation management software including what it can and cannot do; Advice on selecting the right program for the right researcher and the right project; A comparison of citation managers on the market; Leveraging citation managers to provide library services; Citation management as a collaboration and networking tool; Ways to use citation managers to facilitate proper citation practices and avoiding plagiarism; Citation managers to tame the unruly folders on your desktop; Mobile citation management; Future trends. This book focuses on the four citation managers commonly used in libraries: EndNote, Mendeley, RefWorks and Zotero, but other noteworthy tools are also described. Citation Management Tools: A Practical Guide for Librarians provides librarians with the essential skills and information required to support the use of citation managers at their libraries and explore creative ways to use these tools.

MEP Systems Cost Estimating Toolkit: From Foundations to Final Bids Charles Nehme, In the dynamic world of construction accurate cost estimating is not merely a task; it is an art and a science, a cornerstone of successful project delivery. For Mechanical, Electrical, and Plumbing (MEP) systems, this accuracy becomes even more critical due to their inherent complexity, intricate interdependencies, and significant impact on a building's functionality and operational costs. Far too often, project delays, budget overruns, and even project failures can be traced back to incomplete or imprecise MEP estimates. Having spent years navigating the nuances of construction estimating from the initial conceptual stages to final bid proposals, I recognized a persistent need for a practical, accessible, and comprehensive resource specifically tailored for MEP systems. This toolkit is born from that observation, a desire to bridge the gap between theoretical knowledge and real-world application. This isn't just another textbook filled with abstract concepts; this is a hands-on guide meticulously crafted to provide you with the quick references, shortcut tables, labor productivity charts, and most importantly, the pre-formatted Excel and Google Sheet templates you need to build robust, reliable estimates with confidence. We'll delve into the power of RSMeans data, explore effective material and labor costing strategies, and equip you with the tools to manage risk and deliver accurate bids. Whether you are an aspiring estimator, a seasoned project manager, or an engineer looking to enhance your costing prowess, this book is designed to be your indispensable companion. It's built to be dog-eared, highlighted, and

frequently referenced a living document that evolves with your estimating journey Our goal is to empower you to not just calculate costs but to truly understand them enabling smarter decisions and more profitable projects Welcome to your essential MEP Systems Cost Estimating Toolkit Let's build better estimates together
