Among the tasks included in the Microsoft Word 2003 Normal User test are: formatting a document, viewing a document, using tools, employing stylistic actions, creating tables, sorting data, and conducting mail merges. The Microsoft Word 2003 Power User test attempts to provide the basis for separating candidates who possess limited exposure to Microsoft Word 2003 with those who are conversant with the full functionality of the software. Advanced Formatting, Auto Text, Templates, Tables, and Toolbars are among some of the topics addressed in this examination. This test is designed to assess candidates who will be required to use some of the more advanced features of the program on a daily basis.

Tests for Microsoft Excel 2003 and Microsoft Project 2002 are also available.

Prove It Pick Pack Test Answers:

Prove It with Figures Hans Zeisel, David Kaye, 2012-12-06 Prove It With Figures displays some of the tools of the social and statistical sciences that have been applied to the proof of facts in the courtroom and to the study of questions of legal importance. It explains how researchers can extract the most valuable and reliable data that can conveniently be made available and how these efforts sometimes go awry. In the tradition of Zeisel's Say It with Figures, a standard in the field of social statistics since 1947, it clarifies in non-technical language some of the basic problems common to all efforts to discern cause and effect relationships. Designed as a textbook for law students who seek an appreciation of the power and limits of empirical methods, the work also is a useful reference for lawyers, policymakers, and members of the public who would like to improve their critical understanding of the statistics presented to them. The many case histories include analyses of the death penalty, jury selection, employment discrimination, mass torts, and DNA profiling. Hans Zeisel was Professor of Law and Sociology Emeritus at the University of Chicago, where he pioneered the application of social science to the law. Earlier, he had a distinguished career in public opinion and market research. He has written on a wide variety of topics ranging from research methodology and history to law enforcement, juries, and Shakespeare. He was elected Fellow of the American Statistical Association and the American Association for the Advancement of Science, and in 1980 he was inducted into the Market Research Hall of Fame. David Kaye is Regents Professor at the Arizona State University, where he teaches evidence and related topics.
