

Republican Experiment

Sept. 27, 2019

A. Making a republic—a form of self-government in which the people rule

1. Bad Experience: 1763-1776

- unwritten English Constitution
 - fundamental arguments
 - Common Law
 - Adjudicated by local judges
 - Every law parliament made “we are the constitution”
 - *Ever changing constitution*
- centralized taxation
- legislative sovereignty
 - Parliament had declared they were the supreme authority
 - Anything they wanted was a part of the constitution
 - No difference in the constitution and the government
 - Colonists had a bad experience with this
- virtual representation
- mixed government
 - Meant that you should have a system that mixes balances monarchy, aristocracy, and democracy
 - Bad experience here too

2. Theory

- natural rights: life, liberty, property, pursuit of happiness
 - Unalienable rights
 - The whole point of government is to preserve and protect these rights
 - *This is an essential body of theory for the Americans*
- republicanism: consent, virtue, personal independence
 - A system of popular self-government with no king
 - Based on the consent of the governed
 - No republic without citizens
 - Had to possess virtue — had to be willing to sacrifice his self-interest for the greater public good
 - Bad experience with executive authority

Republican Experiment Study Guide:

Machiavelli's Liberal Republican Legacy Paul A. Rahe, 2005-11-14 The significance of Machiavelli's political thinking for the development of modern republicanism is a matter of great controversy. In this volume a distinguished team of political theorists and historians reassess the evidence examining the character of Machiavelli's own republicanism and charting his influence on Marchamont Nedham, James Harrington, John Locke, Algernon Sidney, John Trenchard, Thomas Gordon, David Hume, the Baron de Montesquieu, Benjamin Franklin, George Washington, John Adams, Thomas Jefferson, James Madison, and Alexander Hamilton. This work argues that while Machiavelli himself was not liberal, he did set the stage for the emergence of liberal republicanism in England. By the exponents of commercial society he provided the foundations for a moderation of commonwealth ideology and exercised considerable if circumscribed influence on the statesmen who founded the American Republic. Machiavelli's Liberal Republican Legacy will be of great interest to political theorists, early modern historians, and students of the American political tradition.

Secular Spirituality Lynn L. Sharp, 2006-09-22 Secular Spirituality challenges the traditional dichotomy between Enlightenment reason and religion. It follows French romantic socialists and spiritists search for a new spirituality based on reincarnation as a path to progress for individuals and society. Leaders like Allan Kardec argued for social reform; spiritist groups strove for equality and women; mediums challenged gender roles. Lynn L. Sharp looks closely at what it meant to practice spiritism, analyzing the movement's social and political critique and explaining the popularity of the new belief. She explores points of convergence and conflict in the interplay between spiritism and science, spiritism and psychology, and spiritism and the Catholic church to argue that the nineteenth century was not as disenchanted as has been thought. Secular Spirituality successfully places spiritism within a larger cultural conversation, going beyond the leaders of the movement to look at the way spiritism functioned for its followers.

Geographies of the Book Charles W.J. Withers, 2016-04-15 The geography of the book is as old as the history of the book though far less thoroughly explored Yet research has increasingly pointed to the spatial dimensions of book history to the transformation of texts as they are made and moved from place to place from authors to readers and within different communities and cultures of reception Widespread recognition of the significance of place of the effects of movement over space and of the importance of location to the making and reception of print culture has been a feature of recent book history work and draws in many instances upon studies within the history of science as well as geography Geographies of the Book explores the complex relationships between the making of books in certain geographical contexts the movement of books epistemologically as well as geographically and the ways in which they are received

The Qualifications Gap Nichole M. Bauer, 2020-07-30 What does it take for women to win political office This book uncovers a gendered qualifications gap showing that women need to be significantly more qualified than men to win elections Applying insights from psychology and political science and drawing on experiments public opinion data and content analysis Nichole M Bauer presents new evidence of how voter biases and informational asymmetries combine to disadvantage female candidates The book shows that voters conflate masculinity and political leadership receive less information about the political experiences of female candidates and hold female candidates to a higher qualifications standard This higher standard is especially problematic for Republican female candidates The demand for masculinity in political leaders means these women must look like men but also be better than men to win elections
