Reputations Fade Away:

Of Friends and Foes Mark Crescenzi, 2018-01-25 How do countries form reputations Do these reputations affect interstate politics in the global arena Reputations abound in world politics but we know little about how state reputations form and how they evolve over time We frequently use words like trust credibility resolve integrity risk known commodity and brand to name a few overlapping with reputation like a Venn diagram As a result the concept of reputation often gets stretched or diluted weakening our ability to ascertain its role in cooperation and conflict In this book Crescenzi develops a theory of reputation dynamics to help identify when reputations form in ways that affect world politics both in the realms of international conflict and cooperation A reputation for honoring one's obligations in a treaty for example can make a state a more attractive ally A reputation for war and conflict can trigger more of the same leading to a cycle of violence that exacerbates security challenges While these processes of cooperation and conflict seem distinct they are linked by a common use of the information held in each state's reputation In each case states use reputational information in an attempt to resolve the uncertainty they face when crafting foreign policy decisions With this theory in place Crescenzi uses a blend of historical and empirical analysis to convince the reader that reputations do indeed matter in world politics Moreover we are able to identify patterns of reputation's influence in international relations He demonstrates that over time and across the globe reputations for conflict exacerbate crises while reputations for cooperation and reliability make future cooperation more likely

Reputations Fade Away Dawayne Williams, 2006-11 By any yardstick you want to use Dawayne Williams had a very tough childhood He and his younger brother were raised in the projects in Washington DC by a single mom while his dad who denied paternity was in and out of prison for a variety of criminal offenses Consequently Dawayne grew up without a male role model to emulate So it's no surprise that he joined a street gang as a junior high school student to deal crack and weed and woo older women until he ended up shot and stabbed multiple times and behind bars like his absentee father This autobiography is written in vivid words that jump right off the pages Since being born again Dawayne has found Jesus and sworn off most of his profligate ways once and for all though he does confess to falling off the wagon occasionally Secure

Self Re-Organizing of Nodes Using Closeness Technique in Cluster MANET C. Sathiya Kumar, K. Duraiswamy, 2017-11-01

Mobile ad hoc network MANET is defined as a self configuring infrastructureless network used for communication by wireless links with the support of mobile devices A MANET is referred to as a wireless network with independent nodes moving freely with respect to each other Due to the independent free moves of nodes a huge amount of packet data loss occurs in transmitting the packet from source to destination The risk of node misbehaviour is extremely high The unsecured ad hoc network environment is initiated due to the active nature of networks and node mobility In addition the task of key management is more complex in ad hoc network Due to the nature of free moving characteristics MANET faces improper node cooperation The main reason behind ineffective node cooperation is presence of malicious or selfish nodes Moreover

the existence of malicious unauthenticated nodes causes insecure communication Hence the proposed system aims in the development of proper node cooperation malicious node detection and secure communication in MANET
