**Handbook of Research on Connecting Research Methods for Information Science Research** Ngulube, Patrick, 2019-12-13. In today's globalized world, viable and reliable research is fundamental for the development of information. Innovative methods of research have begun to shed light on notable issues and concerns that affect the advancement of knowledge within information science. Building on previous literature and exploring these new research techniques are necessary to understand the future of information and knowledge. The *Handbook of Research on Connecting Research Methods for Information Science Research* is a collection of innovative research on the methods and application of study methods within library and information science. While highlighting topics including data management, philosophical foundations, and quantitative methodology, this book is ideally designed for librarians, information science professionals, policymakers, advanced level students, researchers, and academicians seeking current research on transformative methods of research within information science.

***Risk and Africa*** Lena Bloemertz, 2012. Through a range of articles, this book explores the changing nature of risk in contemporary African societies. It provides a valuable addition to the current debate on the concept of risk, which has traditionally been skewed in favor of a European historical experience. The contributions illustrate that technological hazards, pollution, and climate change, as well as the introduction of new forms of insurance and the restructuring of civil society, are just some of the recent developments that invite us to be skeptical of prevailing notions of risk in the African context. The reader is encouraged to move away from focusing on the vulnerability of Africa as a pre-modern society to consider more localized and contemporary perspectives of risk. In exploring new ways of conceptualizing risk in Africa, the book addresses the challenge of making theoretical and methodological advances in risk research relevant to understanding the processes of social change on the continent.

Series: *Articles on African Studies*. *Beitrage zur Afrikaforschung*, Vol. 51.
