The Elements of Inquiry Peter J. Burke, Sara Jimenez Soffa, 2018-03-23 *The Elements of Inquiry* covers the basic guidelines for graduate students doing an investigation or inquiry project It distills the rubrics necessary for teaching research methods and completing research projects and gives the student researcher a list of steps to follow to complete any type of inquiry project including formal research projects such as doctoral dissertations It was written to support the work of students in an educational leadership doctoral program but it will also assist the research efforts of college students at any level in any discipline The book begins by establishing the underlying philosophical concepts upon which all good research is based preparing students to get down to the nuts and bolts of conducting their own research and evaluating the research of others Fundamental concepts and rules of research are explained both for producers and consumers of social science and educational research Numerous practical examples illustrate the steps in the research process presented in the text There are end of chapter exercises for students to apply the concepts discussed in the chapter Templates for organizing and presenting research provide students with a game plan for success with their research The book ends with an up to date annotated bibliography of beginning and advanced research texts allowing students easy access to books that detail the more specialized research topics While most research books detail one or more method in depth this text provides a broad introduction to many techniques and models used in doctoral dissertations and will be of particular value to those who are consumers of inquiry studies and research reports Key to the overview provided is the annotated bibliography that leads the reader to the next stage of understanding or doing research

Research Methods in Information Alison Jane Pickard, 2013-01-23 The long awaited 2nd edition of this best selling research methods handbook is fully updated and includes brand new coverage of online research methods and techniques mixed methodology and qualitative analysis This edition includes two new contributed chapters Professor Julie McLeod Sue

Childs and Elizabeth Lomas focus on research data management applying evidence from the recent JISC funded DATUM project Dr Andrew Shenton examines strategies for analysing existing documents The first to focus entirely on the needs of the information and communications community this handbook guides the would be researcher through the variety of possibilities open to them under the heading research and provides students with the confidence to embark on their dissertations The focus here is on the doing and although the philosophy and theory of research is explored to provide context this is essentially a practical exploration of the whole research process with each chapter fully supported by examples and exercises tried and tested over a whole teaching career Readership Students of information and communications studies and archives and records management and practitioners beginning a piece of research
