Beyond Leadership Scott Eacott, 2017-11-06 This book systematically elaborates Scott Eacott's relational approach to organizational theory in education Contributing to the relational trend in the social sciences it first surveys relational scholarship across disciplines before providing a nuanced articulation of the relational research program and key concepts such as organizing activity auctors and spatio temporal conditions It also includes critical commentaries on the program from key figures such as Tony Bush Megan Crawford Fenwick English Helen Gunter Izhar Oplatka Augusto Riveros and Dawn Wallin As such the text models an approach to or social epistemology for building knowledge claims in relation rather than through parallel monologues Eacott's relational approach provides a distinctive post Bourdieusian variant of the relational sociological project Shifting the focus of inquiry from entities e.g. leaders organizations to organizing activity and recognizing how auctors generate simultaneously emerging from and constitutive of spatio temporal conditions unsettles the orthodoxy of organizational theory in educational administration and leadership By presenting its claims in the context of other approaches the book stimulates intellectual debate among both relational sociologists and opponents of relational approaches Beyond Leadership provides significant insights into the organizing of education As it does not fit neatly into any one field but instead blends educational administration and leadership organizational studies and relational sociology among others it charts new territory and promotes important dialogue and debate
