Rethinking Aids Prevention Learning From Successes In Developing Countries:

Rethinking AIDS Prevention Edward C. Green, 2003-11-30 This is not another book about how AIDS is out of control in Africa and Third World nations or one complaining about the inadequacy of secured funds to fight the pandemic The author looks objectively at countries that have succeeded in reducing HIV infection rates along with a worrisome flip side to the progress The largely medical solutions funded by major donors have had little impact in Africa the continent hardest hit by AIDS Instead relatively simple low cost behavioral change programs stressing increased monogamy and delayed sexual activity for young people have made the greatest headway in fighting or preventing the disease s spread Ugandans pioneered these simple sustainable interventions and achieved significant results As National Review journalist Rod Dreher put it Rather than pay for clinics gadgets and medical procedures especially in the important earlier years of its response to the epidemic Uganda mobilized human resources In a New York Times interview Green cited evidence that partner reduction promoted as mutual faithfulness is the single most effective way of reducing the spread of AIDS That deceptively simple solution is not merely about medical advances or condom use It is about the ABC model Abstain Be faithful and use Condoms if A and B are impossible Yet deeply rooted Western biases have obstructed the effectiveness of AIDS prevention Many Western scientists have attacked the ABC approach as impossible and moralistic Some Western activists and HIV carriers have been outraged thinking the approach passes moral judgment on their behaviors But there is also a troubling suspicion among a growing number of scientists who support the ABC model that certain opponents may simply be AIDS profiteers more interested in protecting their incomes than battling the disease This book is a bellwether in the escalating controversy offering persuasive evidence in support of the ABC approach and exposing the fallacies and motivations of its opponents

Perspectives on Thought Leadership for Africa's Renewal Kwandiwe Kondlo, 2014-05-05 This book outlines perspectives of emerging and established African scholars on what one could describe as the debate on leadership and the articulation of the life of the mind in Africa's socio-economic political and cultural life from the time of independence to date The papers contained in the book cover the following thematic areas Alternative Leadership Paradigm for Africa's Advancement African Perspectives on Globalisation and international relations Pan Africanism and the African Renaissance

Scientific Technological and Cultural Dimensions of African Development The first section deals with alternative leadership paradigms for Africa s advancement It also debates the thin line separating management studies from leadership studies and untangles the hermeneutic complexities in the term leadership Section two examines among other things the crucial challenge of globalisation and public ethics and others African perspectives The section also interrogates the current complexities and credibility deficits in the global governance of trade and towards the end engages philosophical questions about conscience and consciousness in African development and progress The debates in section three continue to section four and focus on the overall issues of language and liberation the significance of Multi Interand Trans Disciplinary Approaches in the analysis of the African continent appropriate indigenous paradigms for promoting the African renaissance as well as a series of debates on the meaning and prospects of regional integration in Africa s renewal This provides just a snapshot of a very wide ranging and interesting debate contained in the publication **Religion and Economics** Resit
