Rethinking Disaster Recovery A Hurricane Katrina Retrospective:

Rethinking Disaster Recovery Jeannie Haubert, 2015-02-05 *Rethinking Disaster Recovery* focuses attention on the social inequalities that existed on the Gulf Coast before Hurricane Katrina and how they have been magnified or altered since the storm. With a focus on social axes of power such as gender, sexuality, race, and class, this book tells new and personalized stories of recovery that help to deepen our understanding of the disaster. Specifically, the volume examines ways in which gender and sexuality issues have been largely ignored in the emerging post-Katrina literature. The voices of young racial and ethnic minorities growing up in post-Katrina New Orleans also rise to the surface as they discuss their outlook on future employment. Environmental inequities and the slow pace of recovery for many parts of the city are revealed through narrative accounts from volunteers helping to rebuild. Scholars who were themselves impacted tell personal stories of trauma, displacement, and recovery as they connect their biographies to a larger social context. These insights into the day-to-day lives of survivors over the past ten years help illuminate the complex disaster recovery process and provide key lessons for all too likely future disasters. How do experiences of recovery vary along several axes of difference? Why are some able to recover quickly while others struggle? What is it like to live in a city recovering from catastrophe, and what are the prospects for the future? Through on-the-ground observation and keen sociological analysis, *Rethinking Disaster Recovery* answers some of these questions and suggests interesting new avenues for research.

The Routledge Handbook of Disaster Response and Recovery Bimal

Kanti Paul, Luke Juran, 2025-03-25 The Routledge Handbook of Disaster Response and Recovery covers the two post disaster stages of the disaster cycle and presents an extensive and cutting edge overview of their many considerations. Organized into two parts, Response and Recovery, this handbook details the history, theories, methods, debates, and emerging issues in the stages of response and recovery. Using a transdisciplinary approach, the myriad topics examined in this handbook include search and rescue, myths related to disaster response, technological methods for response and recovery among vulnerable populations, and the intersection of disasters and mental health. Contributors discuss these issues both globally as well as country and disaster specific. This book is an essential guide and reference not only for scholars engaged in disaster research but also for undergraduate and graduate students, policy makers, disaster managers, international and supranational agencies, and humanitarian and volunteer organizations engaged in disaster management. *Disaster Relief* Alan Marzilli, 2007

Hurricane Katrina brought to light many questions about Americans' preparedness for handling large scale disasters. Is FEMA effective? Are the local, state, and federal governments sufficiently coordinated? Examining issues from various perspectives, this work offers students the tools to form their own opinions by bringing such events into focus. *Managing Emergencies and Crises: Global Perspectives* Naim Kapucu, Alpaslan Özerdem, Abdul-Akeem Sadiq, 2022-03-30

Managing Emergencies and Crises: Global Perspectives is primarily for graduate level students and instructors who study and research on a wide range of socio-economic and political issues related to the management of natural disasters from a social disaster perspective. From a broad perspective, this book covers various concepts including prevention, preparedness, response, and recovery as well as vulnerability and risk assessment that need to be understood by those in the emergency management field. Disaster Risk

Irasema Alcántara-Ayala, Christopher Gomez, Ksenia Chmutina, Dewald van Niekerk, Emmanuel Raju, Victor Marchezini, Jake Rom Cadag, JC Gaillard, 2022-10-13 The text offers a comprehensive and unique perspective on disaster risk associated with natural hazards. It covers a wide range of topics reflecting the most recent debates but also older and pioneering discussions in the academic field of disaster studies as well as in the policy and practical areas of disaster risk reduction (DRR). This book will be of particular interest to undergraduate students studying geography and environmental studies/science.
