It also has a strong scholarly foundation and more than 400 new references. This new edition retains and expands the strengths of previous editions and introduces several important changes. The text features more women, people of color, and others who are historically marginalized, as well as new sections about early Black psychology and barriers faced by people who are diverse. It also includes expanded discussions of eugenics and racism in early psychology. There is new content on the history of the biological basis of psychology, the emergence of qualitative methods, and ecopsychology, ecotherapy, and environmental psychology. Recent historical findings about social psychology, including new historical findings about the Stanford Prison Experiment, Milgram's obedience research, and Sherif's conformity studies, have also been incorporated.
