corporations which were beginning to supplant traditional American propriety enterprises Encouraged by Theodore Roosevelt and William Howard Taft these revisionists worked to rationalize the emerging corporate market system and U S foreign commercial relations without promoting anticorporate activism Wolman suggests that through both consensus and conflict the Republican revisionists of the McKinley Roosevelt and Taft era laid the foundation for modern systems of liberal trade In detailing how they did so Wolman offers new insights not only on the tariff question but also on related concerns in U S foreign economic policy including business state relations corporate development international treaty making and imperialism Originally published 1992 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value
