

The background of the cover is a stylized, high-contrast illustration of a city skyline. The colors are primarily blue and red, creating a dramatic, almost abstract effect. In the upper right, a silhouette of a person is visible, possibly standing on a rooftop or a high structure, looking out over the city. The buildings are represented by various geometric shapes and patterns, with some areas appearing more detailed than others. The overall composition is dynamic and visually striking.

Protective Relay Application Guide:

Electrical Power System Protection C. Christopoulos, A. Wright, 2013-04-18 The death of Professor Arthur Wright in the summer of 1996 deprived me of a friend and a colleague whose judgement and experience shaped this book I pay tribute to his contributions to protection and electrical engineering education In the five years since the first edition appeared many developments have taken place and it is now necessary to update the book The use of digital communications and advanced signal processing techniques is now widespread and several fully numeric relays are available from manufacturers Two new Chapters 13 and 14 have been added to introduce readers to these concepts and associated techniques Artificial intelligence is making its impact in all engineering applications and power system protection is no exception Expert systems fuzzy logic artificial neural networks adaptive and integrated protection synchronized measurements using the global positioning system genetic algorithms flexible ac transmission systems are some of the techniques considered in connection with protection Although many of these techniques have not yet found major application in protection it is nevertheless essential for the educated protection engineer to have a basic understanding of the underlying principles and methodology so that he or she can evaluate their suitability for new relaying problems and applications Chapter 15 was therefore added to guide readers through this developing area I have also added some new material in other chapters to reflect changes over the past years
