Protein Interaction Networks Computational Analysis:

Protein Interaction Networks Aidong Zhang, 2009 The first comprehensive survey of statistical topological data mining and ontology based methods for analysing protein protein interaction networks

Protein-protein Interactions and Networks Anna Panchenko, Teresa M. Przytycka, 2010-04-06 Integrates different approaches from bioinformatics biochemistry computational analysis and systems biology to offer the reader a global view of the diverse data on protein protein interactions and protein interaction networks Protein protein interactions and networks identification analysis and prediction brings together the descriptions of experimental techniques and expounds on different computational algorithms for protein network analysis and prediction of protein and domain interactions Each chapter contains a description of the problem a review of methods and algorithms a list of online resources conclusions and future directions Offering broad coverage on the topic this book will be of interest to researchers from academia and the bioinformatics industry will also be of use to graduate students studying the topic

Computational Analysis of Protein-protein Interaction Networks, 2006

Protein Interaction Networks Aidong Zhang, 2009-04-06 The first full survey of statistical topological data mining and ontology based methods for analyzing protein protein interaction networks

Data Management of Protein Interaction Networks Mario Cannataro, Pietro H. Guzzi, 2012-02-03 Current PPI databases do not offer sophisticated querying interfaces and especially do not integrate existing information about proteins Current algorithms for PIN analysis use only topological information while emerging approaches attempt to exploit the biological knowledge related to proteins and kinds of interaction e g protein function localization structure described in Gene Ontology or PDB The book discusses technologies standards and databases for respectively generating representing and storing PPI data It also describes main algorithms and tools for the analysis comparison and knowledge extraction from PINs Moreover some case studies and applications of PINs are also discussed

Protein-protein Interactions and Networks Anna Panchenko, Teresa M. Przytycka, 2010-10-22 The biological interactions of living organisms and protein protein interactions in particular are astonishingly diverse This comprehensive book provides a broad thorough and multidisciplinary coverage of its field It integrates different approaches from bioinformatics biochemistry computational analysis and systems biology to offer the reader a comprehensive global view of the diverse data on protein protein interactions and protein interaction networks

Protein-protein Interaction Confidence Assessment and Network Clustering Computational Analysis Mathieu Lavallée-Adam, 2014 Protein protein interactions represent a crucial source of information for the understanding of the biological mechanisms of the cell In order to be useful high quality protein protein interactions must be computationally extracted from the noisy datasets produced by high throughput experiments such as affinity purification Even when filtered protein protein interaction datasets are obtained the task of analyzing the network formed by these numerous interactions remains tremendous Protein protein interaction networks are large intricate and require computational approaches to

provide meaningful biological insights The overall objective of this thesis is to explore algorithms assessing the quality of protein protein interactions and facilitating the analysis of their networks This work is divided into four results 1 a novel Bayesian approach to model contaminants originating from affinity purifications 2 a new method to identify and evaluate the quality of protein protein interactions independently in different cell compartments 3 an algorithm computing the statistical significance of clusterings of proteins sharing the same functional annotation in protein protein interaction networks and 4 a computational tool performing sequence motif discovery in 5 untranslated regions as well as evaluating the clustering of such motifs in protein protein interaction networks

Biological Data Mining in Protein Interaction Networks Li,

Xiao-Li,Ng, See-Kiong,2009-05-31 The goal of this book is to disseminate research results and best practices from cross disciplinary researchers and practitioners interested in and working on bioinformatics data mining and proteomics Provided by publisher

Protein-Protein Interaction Assays

Mahmood-Ur-Rahman Ansari,2018-07-18 The chapters in this book are written by a team of well reputed international researchers The objective is to provide advanced and updated information related to protein protein interactions I hope the methods resources and approaches described here will enhance the available knowledge of the reader significantly

Protein Interaction Networks in Health and Disease

Spyros Petrakis,Miguel A. Andrade-Navarro,2016-10-19 The identification and mapping of protein protein interactions PPIs is a major goal in systems biology Experimental data are currently produced in large scale using a variety of high throughput assays in yeast or mammalian systems Analysis of these data using computational tools leads to the construction of large protein interaction networks which help researchers identify novel protein functions However our current view of protein interaction networks is still limited and there is an active field of research trying to further develop this concept to include important processes the topology of interactions and their changes in real time the effects of competition for binding to the same protein region PPI variation due to alternative splicing or post translational modifications etc In particular a clinically relevant topic for development of the concept of protein interactions networks is the consideration of mutant isoforms which may be responsible for a pathological condition Mutations in proteins may result in loss of normal interactions and appearance of novel abnormal interactions that may affect a protein s function and biological cycle This Research Topic presents novel findings and recent achievements in the field of protein interaction networks with a focus on disease Authors describe methods for the identification and quantification of PPIs the annotation and analysis of networks considering PPIs and protein complexes formed by mutant proteins associated with pathological conditions or genetic diseases
