Verduin, 2024-03-26 The gold standard reference for all those who work with people with mental illness Kaplan Sadock s Comprehensive Textbook of Psychiatry edited by Drs Robert Boland and Marcia L Verduin has consistently kept pace with the rapid growth of research and knowledge in neural science as well as biological and psychological science This two volume eleventh edition offers the expertise of more than 600 renowned contributors who cover the full range of psychiatry and mental health including neural science genetics neuropsychiatry psychopharmacology and other key areas **Fads and Fallacies in Psychiatry** Joel Paris, 2023-03-23 This text examines the fads and fallacies both past and present that have plagued psychiatric diagnosis treatments and research It argues that such practices have led to an over diagnosis of conditions such as depression bipolar disorder ADHD PTSD and autism It examines the over treatment of psychiatric disorders with pharmaceuticals and asks if neuroscience will actually hold the answers to the biggest questions in the field Thoroughly updated in light of new research this new edition addresses some of the more recent developments in psychiatry including behavioural genetics genome wide association studies and brain imaging It looks at new advances in psychotherapies and argues for a broad biopsychosocial model The book will inform psychiatrists clinical psychologists other mental health professionals and medical students of the limits of mental health practice and the importance of adopting cautious conservatism and the principles of evidence based practice Psychomotor Symptomatology in Psychiatric Illnesses Manuel Morrens, Sebastian Walther, 2015-12-10 Psychomotor symptoms are those symptoms that are characterized by deficits in the initiation execution and monitoring of movements such as psychomotor slowing catatonia neurological soft signs NSS reduction in motor activity or extrapyramidal symptoms EPS These symptoms have not always received the attention they deserve although they can be observed in a wide range of psychiatric illnesses including mood disorders psychotic disorders anxiety disorders pervasive developmental disorders and personality disorders Nevertheless these symptoms seem to have prognostic value on clinical and functional outcome in several pathologies In the

late 19th century the founding fathers of modern psychiatry including Kahlbaum Wernicke Kraepelin and Bleuler had a strong focus on psychomotor abnormalities in their description and definitions of psychiatric illnesses and systematically recognized these as core features of several psychiatric pathologies Nevertheless emphasis on these symptoms has reduced substantially since the emergence of psychopharmacology given the association between antipsychotics or antidepressants and medication induced motor deficits This has resulted in the general idea that most if not all psychomotor deficits were merely side effects of their treatment rather than intrinsic features of the illness Yet the last two decades a renewed interest in these deficits can be observed and has yielded an exponential growth of research into these psychomotor symptoms in several psychiatric illnesses This recent evolution is also reflected in the increased appreciation of these symptoms in the DSM 5 As a result of this increased focus new insights into the clinical and demographical presentation the etiology the course the prognostic value as well as treatment aspects of psychomotor symptomatology in different illnesses has emerged Still many new questions arise from these findings This research topic is comprised of all types of contributions original research reviews and opinion piece with a focus on psychomotor symptomatology in a psychiatric illness especially research focusing on one or more of the following topics the clinical presentation of the psychomotor syndrome the course through the illness the diagnostical specificity of the syndrome the underlying neurobiological or neuropsychological processes new assessment techniques pharmacological or non pharmacological treatment strategies
