

UNIT 7- MOTIVATION, EMOTION, PERSONALITY

7.1 – Theories of Motivation

Basic Motivational Concepts

- **Motivation** – needs/desires that energize/direct behavior
- **Primary needs** – innate/hardwired (hunger, thirst, need for warmth)
- **Secondary needs** – psychological (social approval, belongingness, love)
- **Incentive** – any stimulus that motivates a behavior
- **Intrinsic motivation** – performing a behavior for its desired outcome (reading a book for getting good grades)
- **Extrinsic motivation** – performing behavior without seeking its desired outcome (just for fun)
- **Overjustification effect** – extrinsic incentives diminish intrinsic motivation to perform a task (not doing your school behavior because you expect something in return)
- **Self-efficacy** – belief one can execute a task successfully
- **Self-referent motivation** – desire for significant accomplishment for mastery/high achievement/interest
- **Flow effect** – The more behavior a behavior is leading to desirable outcome more likely to occur (eating, drinking, exercising, taking a drug creates homeostasis, so it will be repeated)

Motivational Theories

- **Drive-reduction theory** ppl are motivated to reduce our drives
 - Drives – sensation of arousal caused by biological/psychological needs
 - Drive-reducing behaviors – we are motivated to engage in behaviors that reduce drives in order to maintain homeostasis (hunger/dinner, cold/blanket)
 - (thirst/thirst → drive hunger → drive reducing behavior eating → homeostasis met, hungry)
 - (bored/bored makes you study/try to get good grades makes you study)
 - (reading a book for enjoyment)
- **Arousal theory** – we are motivated to behave to reach an optimal level of arousal (high optimal level – ADHD, and ADP, low level – regular, normal)
- **Yerkes – Dodson Law** : little arousal → no motivation (high arousal → mostly due to performance)
(different arousal takes away chance and there is not motivated to try in them, since so easy)
