Out Of Reach Place Poverty And The New American Welfare State:

Out of Reach Scott W. Allard, 2009-01-01 Changes in welfare programmes since 1996 have transformed the way America cares for its poor For every dollar spent on cash welfare payments 20 dollars are spent on service programmes targeted at the working poor This text examines the system and the role that geography plays in the system s ability to offer help *The Oxford Handbook of Civil Society* Michael Edwards, 2013-07-04 Broadly speaking The Oxford Handbook of Civil Society views the topic of civil society through three prisms as a part of society voluntary associations as a kind of society marked out by certain social norms and as a space for citizen action and engagement the public square or sphere *American Gridlock* James A. Thurber, Antoine Yoshinaka, 2015-11-12 American Gridlock brings together the country s preeminent experts on the causes characteristics and consequences of partisan polarization in US politics and government with each chapter presenting original scholarship and novel data This book is the first to combine research on all facets of polarization among the public both voters and activists in our federal institutions Congress the presidency and the Supreme Court at the state level and in the media Each chapter includes a bullet point summary of its main argument and conclusions and is written in clear prose that highlights the substantive implications of polarization for representation and policy making Authors examine polarization with an array of current and historical data including public opinion surveys electoral and legislative and congressional data experimental data and content analyses of media outlets American Gridlock s theoretical and empirical depth distinguishes it from any other volume on polarization *Planning Sustainable Cities and Regions* Karen Chapple, 2014-09-15 As global warming advances regions around the world are engaging in revolutionary sustainability planning but with social equity as an afterthought California is at the cutting edge of this movement not only because its regulations actively reduce greenhouse gas emissions but also because its pioneering environmental regulation market innovation and Left Coast politics show how to blend the three Es of sustainability environment economy and equity Planning Sustainable Cities and Regions is the first book to explain what this grand experiment tells us about the most just path moving forward for cities and regions across the globe The book offers chapters about neighbourhoods the economy and poverty using stories from practice to help solve puzzles posed by academic research Based on the most recent demographic and economic trends it overturns conventional ideas about how to build more livable places and vibrant economies that offer opportunity to all This thought provoking book provides a framework to deal with the new inequities created by the movement for more livable and expensive cities so that our best plans for sustainability are promoting more equitable development as well This book will appeal to students of urban studies urban planning and sustainability as well as policymakers planning practitioners and sustainability advocates around the world **The State of Nonprofit America** Lester M Salamon, 2012-05-14 Today America s nonprofit organizations seem caught in a force field buffeted by four impulses voluntarism professionalism civic activism and commercialism Too little attention however has been paid to the significant tensions among these impulses

Understanding this force field and the factors shaping its dynamics thus becomes central to understanding the future of particular organizations and of the nonprofit sector as a whole In this second edition of an immensely successful volume Lester Salamon and his colleagues offer an overview of the current state of America s nonprofit sector examining the forces that are shaping its future and identifying the changes that might be needed The State of Nonprofit America has been completely revised and updated to reflect changing political realities and the punishing economic climate currently battering the nonprofit sector which faces significant financial challenges during a time when its services are needed more than ever The result is a comprehensive analysis of a set of institutions that Alexis de Tocqueville recognized to be more deserving of our attention than any other part of the American experiment

The Oxford Handbook of Historical Institutionalism Orfeo Fioretos, Tulia G. Falletti, Adam Sheingate, 2016-03-17 The Oxford Handbook of Historical Institutionalism offers an authoritative and accessible state of the art analysis of the historical institutionalism research tradition in Political Science Devoted to the study of how temporal processes and events influence the origin and transformation of institutions that govern political and economic relations historical institutionalism has grown considerably in the last two decades With its attention to past present and potential future contributions to the research tradition the volume represents an essential reference point for those interested in historical institutionalism Written in accessible style by leading scholars thirty eight chapters detail the contributions of historical institutionalism to an expanding array of topics in the study of comparative American European and international politics

Social Capital and Economics Asimina Christoforou, John B. Davis, 2014-05-30 This volume provides a collection of critical new perspectives on social capital theory by examining how social values power relationships and social identity interact with social capital This book seeks to extend this theory into what have been largely under investigated domains and at the same time address long standing classic questions in the literature concerning the forms determinants and consequences of social capital Social capital can be understood in terms of social norms and networks It manifests itself in patterns of trust reciprocity and cooperation The authors argue that the degree to which and the different ways in which people exhibit these distinctively social behaviours depend on how norms and networks elicit their values reflect power relationships and draw on their social identities This volume accordingly adopts a variety of different concepts and measures that incorporate the variety of contextually specific factors that operate on social capital formation In addition it adopts an interdisciplinary outlook that combines a wide range of social science disciplines and methods of social research Our objective is to challenge standard rationality theory explanations of norms and networks which overlook the role of values power and identity This volume appeals to researchers and students in multiple social sciences including economics sociology political science social psychology history public policy and international relations that employ social capital concepts and methods in their research It can be seen as a set of new extensions of social capital theory in connection with its themes of social values power and identity that would advance the scholarly literature on

social norms and networks and their impact on social change and public welfare **Perspectives on Fair Housing** Vincent J. Reina, Wendell E. Pritchett, Susan M. Wachter, 2020-11-20 Title VIII of the Civil Rights Act of 1968 known as the Fair Housing Act prohibited discrimination in the sale rent and financing of housing based on race religion and national origin However manifold historical and contemporary forces driven by both governmental and private actors have segregated these protected classes by denying them access to homeownership or housing options in high performing neighborhoods Perspectives on Fair Housing argues that meaningful government intervention continues to be required in order to achieve a housing market in which a person s background does not arbitrarily restrict access The essays in this volume address how residential segregation did not emerge naturally from minority preference but rather how it was forced through legal economic social and even violent measures Contributors examine racial land use and zoning practices in the early 1900s in cities like Atlanta Richmond and Baltimore the exclusionary effects of single family zoning and its entanglement with racially motivated barriers to obtaining credit and the continuing impact of mid century redlining policies and practices on public and private investment levels in neighborhoods across American cities today Perspectives on Fair Housing demonstrates that discrimination in the housing market results in unequal minority households that in aggregate diminish economic prosperity across the country Amended several times to expand the protected classes to include gender families with children and people with disabilities the FHA s power relies entirely on its consistent enforcement and on programs that further its goals Perspectives on Fair Housing provides historical sociological economic and legal perspectives on the critical and continuing problem of housing discrimination and offers a review of the tools that if appropriately supported can promote racial and economic equity in America Contributors Francesca Russello Ammon Raphael Bostic Devin Michelle Bunten Camille Zubrinsky Charles Nestor M Davidson Amy Hillier Marc H Morial Eduardo M Pe alver Wendell E Pritchett Rand Quinn Vincent J Reina Akira Drake Rodriguez Justin P Steil Susan M Wachter *Social Sustainability* Veronica Dujon, Jesse Dillard, Eileen M. Brennan, 2013-08-21 How can we raise the standard of living of the world s poor and maintain high levels of social health and well being in the developed world while simultaneously reducing the environmental damage wrought by human activity The social dimension of sustainability is becoming recognized as a necessary if not sufficient condition for attaining economic and environmental sustainability The requisite dialogue requires inclusion at multi levels This collection of works is an ambitious and multi disciplinary effort to indemnify and articulate the design implementation and implications of inclusion Included are theoretical and empirical pieces that examine the related issues at the local national and international levels Contributors are grounded in Sociology Economics Business Administration Public Administration Public Health Psychology Anthropology Social Work Education and Natural Resource Management Places in Need Scott W. Allard, Scott Allard, 2017-06-20 Americans think of suburbs as prosperous areas that are relatively free from poverty and unemployment Yet today more poor people live in the suburbs than in cities themselves In Places in Need social policy expert

Scott W Allard tracks how the number of poor people living in suburbs has more than doubled over the last 25 years with little attention from either academics or policymakers Rising suburban poverty has not coincided with a decrease in urban poverty meaning that solutions for reducing poverty must work in both cities and suburbs Allard notes that because the suburban social safety net is less developed than the urban safety net a better understanding of suburban communities is critical for understanding and alleviating poverty in metropolitan areas Using census data administrative data from safety net programs and interviews with nonprofit leaders in the Chicago Los Angeles and Washington D C metropolitan areas Allard shows that poor suburban households resemble their urban counterparts in terms of labor force participation family structure and educational attainment In the last few decades suburbs have seen increases in single parent households decreases in the number of college graduates and higher unemployment rates As a result suburban demand for safety net assistance has increased Concerning is evidence suburban social service providers which serve clients spread out over large geographical areas and often lack the political and philanthropic support that urban nonprofit organizations can command do not have sufficient resources to meet the demand To strengthen local safety nets Allard argues for expanding funding and eligibility to federal programs such as SNAP and the Earned Income Tax Credit which have proven effective in urban and suburban communities alike He also proposes to increase the capabilities of community based service providers through a mix of new funding and capacity building efforts Places in Need demonstrates why researchers policymakers and nonprofit leaders should focus more on the shared fate of poor urban and suburban communities This account of suburban vulnerability amidst persistent urban poverty provides a valuable foundation for developing more effective antipoverty strategies
