Out Think How Innovative Leaders Drive Exceptional Outcomes:

Out Think G. Shawn Hunter, 2013-06-14 We've entered a new era. Call it the age of imagination, ideation, conceptualization, creativity, innovation. Take your pick. Creativity, mental flexibility, and collaboration have displaced one-dimensional intelligence and isolated determination as core ingredients of competitive advantage. But these 21st-century methods and mindsets needed to drive innovation are only found by tapping into the discretionary levels of passion and initiative within us. This is where Out Think leadership comes in. Out Think presents big ideas along with actionable advice to drive unique value and innovation in today's chaotic marketplace. In each chapter, a key idea, behavior, or mindset shift is discussed. The shift is illustrated through proprietary interviews with business leaders conducted by the author. Techniques are described to show how the shift or idea can be implemented with real-world examples. Assessments, exercises, and actionable messaging are highlighted throughout the book. While some books address the changing economic landscape and the challenges of the creative age, Out Think is unique in the author's unparalleled access spanning more than a decade to executives and thought leaders who are in fact making a measurable difference. Through interviews and collaboration with these individuals, Hunter has assembled insights, stories, and actionable takeaways with an emphasis on results that can drive the change that leaders want and need in their organizations.

Revealing Creativity Carol A. Mullen, 2020-07-20
Revealing Creativity: Exploration in Transnational Education Cultures explores the recovery and fostering of creativity under educational constraint. This longitudinal global study of diverse education populations in China, Canada, and Australia offers application of the 4 C Creativity Model through experiential activities and exploratory interviews within classrooms and other learning spaces. Transnational in scope, this book describes an original innovative method, process, and tool for addressing obstacles to creativity in educational environments and within the self that constitute a significant challenge to practice. Through an immersive encounter with a validated creativity model, diverse cultural groups were guided to interpret the 4 C classification system and uncover their latent potential as creators. For their own purposes, readers can adapt the dynamic model as method, process, for releasing and revealing creativity within accountability-bound competitive cultures.

Creativity and Education in China Carol A. Mullen, 2017-03-16 Published with Kappa Delta Pi Creativity and Education in China takes readers on a journey through research-supported ideas and practical examples of creative and innovative schooling within a changing regime. Analyzing the consequences of exam-centric accountability on the creative and critical capacities of Chinese students, author Carol A. Mullen's dynamic portrait of a country serves as both a cautionary tale and an inspiring example to emulate. Examining creative endeavors and breakthroughs within a competitive globalized educational landscape, the chapters are organized around environmental and global issues impacting education, expressions of creativity within pre-K-12 schools in China, and creative innovation in higher education learning environments. Presenting captivating cases from the field, the book offers novel approaches to fostering creativity as a natural integrated part of high-stakes

education systems in Eastern and Western cultures alike *Rebooting Pedagogy and Education systems for the Twenty-first Century: Why we need course-corrections immediately* Sujay Rao Mandavilli, 2024-04-09 Education is the fundamental pillar upon which any human civilization rests As a matter of fact no civilization in any meaningful form or degree has been possible in human history that has not been built on the bulwark and edifice of education While literacy may have been limited to the privileged few in early ancient civilizations it was these privileged few who controlled the masses and set the tempo for meaningful progress in such civilizations educational systems have proven to be the bedrock and foundational pillar upon which much of human accomplishment and achievement have rested too In spite of the naysayers the cynics and the pessimists education has expanded greatly in the twentieth century while the worlds earliest civilizations were not western in the canonical sense of the term there is no denying that western civilizations have pulled away strongly since then Riding on the shoulders on ancient Greece western intellectualism has been the bulwark upon which the superstructure of modern civilization has been built Even as recently as the middle of the twentieth century the rest of the world as opposed to the west had a lot of catching up to do Thankfully and mercifully a lot has changed since then India in the 1950 s and 1960 s emphasized higher education but neglected universal primary education as evidenced by low primary school enrollments and a high rate of dropouts Since then programs and schemes such as the Sarva Siksha Abhiyan or education for all programs have increased primary school enrollment considerably India now comfortably stands on the threshold of universal adult literacy While the quantity of education has been augmented quality has often failed to keep pace The tenets and the essential doctrines forming a part and parcel of the foundational pillars of pedagogy and education are antiquated and are still steeped in the western experience What is worse is that is very little awareness on the issue of the need for change this must be the foundation of all meaningful change but alas that foundation has yet to be built In this book we draw upon our long list of papers on the social science particularly anthropological pedagogy and the sociology of science and propose the direction we believe pedagogy must take in the twenty first century This can be no one man army we invite other scholars to contribute in eminent measure We also believe that this i e a foundational assessment of the concepts of pedagogy must become one of the more important and vital movements of the twenty first century This work is also at the heart of our globalization of science movement as many if not most concepts in various fields of the social science are based on old and archaic western centric paradigms There is also an unnatural gap between various fields of social sciences and the non social sciences too just as careerism is rampant across disciplines and what we called institutional coherentism is lacking Scientists say however recent research has shown that Does that mean that old research was wrong Why was it wrong Was it due to the absence of data or was it methodological error Why do we go round and round without a meaningful long term direction Very little scholarship is driven by the absolute desire to do good to society As Thomas Paine once famously stated A body of men holding themselves accountable to nobody ought not to be trusted by anybody We have theories theories and only

theories all driven by old fashioned careerism or academic rivalry and with limited explanatory power All this needs to change in the twenty first century and practical application of knowledge emphasized To quote C S Lewis Experience that most brutal of teachers But you learn my God do you learn Anand Mahindra and several other individuals have repeatedly called for a new world class education system in India and elsewhere but there is very little conceptual clarity on how we should go about creating one Let a million scholars bloom Let a million intellectuals bloom Let a million scientists social scientists included bloom in different parts of the world all in the twenty first century Why should we hold our tongue and suffer in silence Let intellectuals drive meaningful and productive change Let better education systems form the backbone of better societies Let there be a healthy rivalry among nations to develop better and better education systems There is no need for only western nations to take the lead here Those who have better ideas can indeed leapfrog everyone else Those who think better and do better win
