Community and Global Ecology of Deserts is to give an overview and report from the frontiers of desert ecological research The ecology of deserts as a scientific discipline plays a key role in solving many of global problems due to collective adaptation methods and approaches of lifeforms living in extreme environments If ecologists or environmental scientists are talking about desert ecological research then almost everyone is thinking about specific desert flora fauna or desertification itself as a consequence of climate change or sand dune triggered disasters In fact the importance of ecological research in deserts is far more general and broader We hope that our book will be interesting and useful for researchers lecturers students and anybody interested in this field Wetland Systems to Control Urban Runoff Miklas Scholz, 2015-10-22

Wetlands for Water Pollution Control Second Edition covers the fundamental science and engineering principles relevant to the drainage and treatment of both storm and wastewater. Standard and novel design recommendations for predominantly constructed wetlands and related sustainable drainage systems are also provided to account for the interests of professional engineers and environmental scientists. This revised edition deals with the design, operation, maintenance and water quality monitoring of traditional and novel wetland systems but also provides information on the analysis of asset performance and modeling of treatment processes along with performances of existing infrastructures in predominantly developed but also developing countries and the sustainability and economic issues involved. This new edition contains 10 new chapters along with multidisciplinary experimental and modeling orientated case study topics that include natural wetlands, constructed treatment wetlands for pollution control, sustainable drainage systems and specific applications such as wetlands treating hydrocarbon and ammonia as well as ecological sanitation systems recycling treated. Contains a broad overview of water and environmental engineering aspects relevant for the drainage and treatment of storm water and wastewater respectively. Includes standard and novel design, operation, monitoring and maintenance recommendations for predominantly constructed wetlands and related sustainable drainage systems. Provides detailed solutions to pressing water quality challenges associated with constructed treatment wetlands, integrated constructed wetlands, sustainable flood retention basins, farm constructed wetlands and storm water ponds and other sustainable biological filtration and treatment technologies linked to public health engineering.
