Tribes and Empire on the Margins of Nineteenth-Century Iran Arash Khazeni, 2011-06-01 *Tribes and Empire on the Margins of Nineteenth Century Iran* traces the history of the Bakhtiari tribal confederacy of the Zagros Mountains through momentous times that saw the opening of their territory to the outside world As the Qajar dynasty sought to integrate the peoples on its margins into the state the British Empire made commercial inroads into the once inaccessible mountains on the frontier between Iran and Iraq The distance between the state and the tribes was narrowed through imperial projects that included the building of a road through the mountains the gathering of geographical and ethnographic information and

the exploration for oil which culminated during the Iranian Constitutional Revolution These modern projects assimilated autonomous pastoral nomadic tribes on the peripheries of Qajar Iran into a wider imperial territory and the world economy Tribal subjects did not remain passive amidst these changes in environment and society however and projects of empire in the hinterlands of Iran were always mediated through encounters accommodation and engagement with the tribes In contrast to the range of literature on the urban classes and political center in Qajar Iran Arash Khazeni adopts a view from the Bakhtiari tents on the periphery Drawing upon Persian chronicles tribal histories and archival sources from London Tehran and Isfahan this book opens new ground by approaching nineteenth century Iran from its edge and placing the tribal periphery at the heart of a tale about empire and assimilation in the modern Middle East

Reading Orientalism Daniel Martin Varisco, 2017-04-11 The late Edward Said remains one of the most influential critics and public intellectuals of our time with lasting contributions to many disciplines Much of his reputation derives from the phenomenal multidisciplinary influence of his 1978 book *Orientalism* Said's seminal polemic analyzes novels travelogues and academic texts to argue that a dominant discourse of West over East has warped virtually all past European and American representation of the Near East But despite the book's wide acclaim no systematic critical survey of the rhetoric in Said's representation of Orientalism and the resulting impact on intellectual culture has appeared until today Drawing on the extensive discussion of Said's work in more than 600 bibliographic entries Daniel Martin Varisco has written an ambitious intellectual history of the debates that Said's work has sparked in several disciplines highlighting in particular its reception among Arab and European scholars While pointing out Said's tendency to essentialize and privilege certain texts at the expense of those that do not comfortably fit his theoretical framework Varisco analyzes the extensive commentary the book has engendered in Oriental studies literary and cultural studies feminist scholarship history political science and anthropology He employs critical satire to parody the exaggerated and pedantic aspects of post colonial discourse including Said's profound underappreciation of the role of irony and reform in many of the texts he cites The end result is a companion volume to *Orientalism* and the vast research it inspired Rather than contribute to dueling essentialisms Varisco provides a path to move beyond the binary of East versus West and the polemics of blame *Reading Orientalism* is the most comprehensive survey of Said's writing and thinking to date It will be of strong interest to scholars of Middle East studies anthropology history cultural studies post colonial studies and literary studies
