Global Environmental Sustainability Choy Yee Keong, 2020-10-31 Global Environmental Sustainability Case Studies and Analysis of the United Nations Journey toward Sustainable Development presents an integrated interdisciplinary analysis of sustainable development addressing global environmental problems in the contemporary world It critically examines current actions being taken on global and local

scales particularly in relation to the UN's efforts to promote sustainable development. This approach is supported by empirical analysis drawing upon a host of interweaving insights spanning economics, politics, ecology, environmental philosophy, and ethics among others. As a result, it offers a comprehensive and well-balanced assessment of the overall perspective of sustainable development supported by in-depth content analysis, theoretical evaluation, empirical and actual case studies premised on solid data and actual field work. Also, the book marks a milestone in placing the Covid-19 pandemic into a perspective for understanding the universality of human collective environmental behavior and action. By utilizing in-depth analysis, both quantitative and qualitative, and challenging the status quo of what is expected in the global approach to sustainable development, *Global Environmental Sustainability* provides the theory and methodology of empirical sustainable development, which is especially germane to our advanced society today, which is deeply entrenched in a crisis of environmental morality. More particularly, it serves as a salient source of moral reconstitution of society grounded in empirical reality to liberate man's excessive spirit of individualism and self-aggrandizement to the detriment of the environment. Epistemologically, the book furnishes a remarkable tour de force with a new level of analytical insight to help researchers, practitioners, and policymakers in sustainability and environmental science, as well as the many other disciplines involved in sustainable development, to better understand sustainability from a new perspective and provides a methodological direction to pursue solutions going forward. Provides a systematic exposition of sustainable development in all its complexity with all the chapters complementing each other in an integral way. Presents extensive empirical evidence of various environmental problems across the world, including China, the United States, Canada, Southeast Asia, South America, and Africa, and the extent to which the United Nations has succeeded in driving toward global environmental sustainability. Provides a cogent examination of the treatment of our global commons by some of the world's most powerful leaders. Includes data from field studies and in-depth interviews with indigenous people in Borneo's rainforests of the Malaysian state of Sarawak, most affected by environmental change.

Teach Janice Koch, 2018-12-04 *Teach* is a concise introduction to education that challenges readers' preconceived notions of teaching in order to transform them into reflective practitioners. Empathizing with the difficulties students face as they move from the college classroom to their own classrooms, revered author Janice Koch invites readers to both reflect on their own dispositions for teaching and look outside of themselves to the demands of the profession, making the philosophy of teaching and learning accessible and relevant. The Fourth Edition emphasizes the changing student population and the role of technology and globalization in the field while also including the Interstate Teacher Assessment and Support Consortium (INTASC) standards correlating with each chapter's content. With the guidance of this supportive text, readers will gain vital exposure by engaging with professional standards from the very start of their career.

Cities, Networks, and Global Environmental Governance Sofie Bouteligier, 2013 As a result of global dynamics the increasing interconnection of people

and places innovations in global environmental governance have altered the role of cities in shaping the future of the planet. This book is a timely study of the importance of these social transformations in our increasingly global and increasingly urban world. Through analysis of transnational municipal networks such as Metropolis and the C40 Cities Climate Leadership Group, Sofie Bouteligier's innovative study examines theories of the network society and global cities from a global ecology perspective. Through direct observation and interviews and using two types of city networks that have been treated separately in the literature, she discovers the structure and logic pertaining to office networks of environmental non-governmental organizations and environmental consultancy firms. In doing so, she incisively demonstrates the ways in which cities fulfill the role of strategic sites of global environmental governance, concentrating knowledge infrastructure and institutions vital to the function of transnational actors.
