Stories from Home Dr Margaret Ponsonby, 2013-06-28 Most homes in the past were not elite wealthy interiors complete

with high fashion furnishings designed by well known architects and designers as many domestic histories often seem to have assumed As this book makes clear there were in fact an enormous variety of house interiors in England during the period 1750 1850 reflecting the location status and gender of particular householders as well as their changing attitudes tastes and aspirations By focusing on non metropolitan homes which represented the majority of households in England this study highlights the need for historians to look beyond prevailing attitudes that often reduce interiors to generic descriptions based on high fashions of the decorative arts Instead it shows how numerous social and cultural influences affected the manner in which homes were furnished and decorated Issues such as the availability of goods gender regional taste income the second hand market changing notions of privacy and household hierarchies and print culture could all have a significant impact on domestic furnishing The study ends with a discussion of how domestic interiors of historic properties have been presented and displayed in modern times highlighting how competing notions of the past can cloud as well as illuminate the issue Combining cultural history and qualitative analysis of evidence this book presents a new way of looking at ordinary and provincial homes that enriches our understanding of English domestic life of the late eighteenth and early nineteenth centuries

Ready-Made Democracy Michael Zakim, 2003 *Ready Made Democracy* explores the history of men's dress in America to consider how capitalism and democracy emerged at the center of American life during the century between the Revolution and the Civil War Michael Zakim demonstrates how clothing initially attained a significant place in the American political imagination on the eve of Independence At a time when household production was a popular expression of civic virtue homespun clothing was widely regarded as a reflection of America's most cherished republican values simplicity industriousness frugality and independence By the early nineteenth century homespun began to disappear from the American material landscape Exhortations of industry and modesty however remained a common fixture of public life In fact they found expression in the form of the business suit Here Zakim traces the evolution of homespun clothing into its ostensible opposite the woolen coats vests and pantaloons that were ready made for sale and wear across the country In doing so he demonstrates how traditional notions of work and property actually helped give birth to the modern industrial order For Zakim the history of men's dress in America mirrored this transformation of the nation's social and material landscape profit seeking in newly expanded markets organizing a waged labor system in the city shopping at single prices and standardizing a business persona In illuminating the critical links between politics economics and fashion in antebellum America *Ready Made Democracy* will prove essential to anyone interested in the history of the United States and in the creation of modern culture in general
