Green Jobs for Sustainable Development Ana-Maria Boromisa, Sanja Tišma, Anastasya Ležaić, 2015-06-26 A green economy must be built on green jobs the kind of employment that is low carbon intended to reduce energy use and expected to restore environmental quality But attempts to define exactly what a green job is have led to varied and often contradictory answers There are many unresolved questions including whether we consider jobs in the nuclear fuel industry to be green jobs Or is a worker at a glass making company which supplies the glass for the solar photovoltaic industry doing a green job given that glass making is a dirty industry This book deals with the relationship between green concepts green jobs green economy green growth and sustainable development It examines to which extent creation of green jobs supports overall economic development as opposed to creation of elitist jobs and greenwashing In order to do so general conceptual frameworks for green jobs green economy green growth and green policy are presented as well as their implementation in ten countries selected among the Group of Twenty The selection includes advanced the European Union the United States of America Australia Canada Republic of Korea Japan and developing countries Mexico China Turkey and Brazil The analysis presented in this book shows that although green concept is well intentioned its implementation depends on local circumstances economic political and social Developed countries perceive green growth as a way to create new markets and demand while developing countries rely more on labor intensive growth and less expensive green jobs Thus greening the economy does not diminish differences between rich and poor This book is suitable for those who study and work in Ecological Economics Sustainable Development and Labor Economics

Drone Wars: Ethical, Legal and Strategic Implications, 2014-02-15 Lethal drones have been used in the last 12 years by the United States to strike targets and eliminate terrorists in Afghanistan Pakistan Somalia Yemen and a few other countries Details of how armed drones are being used in or outside of declared wars are closely guarded secrets by all three states known to use them However these drones have also been responsible for killing and

injuring thousands of civilians including women and children besides destroying homes and property The US and its allies have claimed that the drone strikes have been spectacularly successful in terms of both finding and killing targeted enemies Drones have been projected as a military necessity and their market is growing fast especially for intelligence surveillance and reconnaissance The use of unmanned drones to target belligerents raises many complex issues It is of crucial importance that traditional ethical rules and practices are applied that rules of international law are observed even while engaging with terrorists There are a few who justify the use of drones but their argument is somewhat similar to the argument used for dropping atomic bombs over Japan in WWII Lethal drones are a weapon of rich nations who have used them to attack poor defenceless nations This book discusses the ethical legal and strategic issues relating to the use of drones in armed conflict
