Our Posthuman Future Consequences Of The Biotechnology Revolution:

Our Posthuman Future Francis Fukuyama, 2003-05 A social philosopher examines how the foundation of liberal democracy which is the belief that all human beings are equal by nature could be shattered by the biotechnology revolution

Our Posthuman Future Francis Fukuyama, 2004 Arguing that the greatest advances still to come will be in the life sciences Fukuyama asks how the ability to modify human behavior will affect liberal democracy He underlines man's changing understanding of human nature through history from Plato Aristotle's belief that man had natural ends to the ideals of utopians dictators of the modern age who sought to remake mankind for ideological ends The ultimate prize of the biotechnology revolution intervention in the germ line the ability to manipulate the DNA of all of one person's descendants will have profound potentially terrible consequences for our political order even if undertaken by ordinary parents seeking to improve their children

The Promise and Peril of AI and IA Ted Peters, 2023-12-31 How should public theologians and social ethicists assess anticipate and amend the projected path taken by Artificial Intelligence and Intelligence Amplification With the advent of generative AI along with large language models suddenly our techie whiz kids are sounding the fire alarm Will a Frankenstein monster escape its creator's design Will more highly evolved superintelligence render today's human race extinct Is this generation morally obligated to give birth to a tomorrow in which we outdated humans can no longer participate This book collects foresighted analyses and recommendations from computer scientists neuroscientists AI ethicists along with Christian and Muslim theologians

Een stralende toekomst Paul Mason, 2019-06-06 Onder invloed van het vrijemarktdenken hebben oude idealen als burgerschap moraal en individuele autonomie moeten plaatsmaken voor zelfzucht hiërarchie en consumptisme Volgens Paul Mason bevinden we ons op dit moment op een kantelpunt Onze op humanistische grondslagen gebouwde wereld wordt ernstig bedreigd de democratie ligt onder vuur autocratische regimes zijn in opkomst en de waarheid wijkt voor fake news Bovendien gaat ons denken ten gronde aan fatalisme we zien onszelf als wezens die gestuurd worden door ons brein en onze genen door mechanismen van de markt of door de algoritmen van Big Tech In Een stralende toekomst roept Paul Mason op tot een humanistische revolutie waarin de mens geïnspireerd door de ideeën die ons sterk maakten het heft in eigen hand neemt op weg naar een stralende menselijke toekomst

Onze toekomst Al Gore, 2013-02-18 Baanbrekend werk van voormalig vicepresident en Nobelprijswinnaar Al Gore Wij staan in onze huidige tijd voor revolutionaire veranderingen waar geen enkel ander tijdsgewricht mee is geconfronteerd In Onze toekomst brengt Al Gore al deze veranderingen in kaart hij onderzoekt de donkere wolken die zich aan de horizon samenvakken en biedt een sobere doorwrochte en uiteindelijk hoopvolle voorspelling over de krachten die onze wereld aan het hervormen zijn Onze toekomst is meeslepend en visionair en toont ons een kaart van de wereld van morgen Al Gore onderscheidt zes verschillende krachten Allereerst de immer groeiende economische globalisering die leidt tot wat Gore Earth Inc noemt de aarde als een geïntegreerde holistische entiteit met andere relaties ten opzichte van kapitaal

arbeidskrachten consumentenmarkten en nationale overheden dan in het verleden Als tweede onderscheidt Gore een revolutionaire ontwikkeling op het gebied van de wereldwijde digitale communicatie the Global Mind waardoor de gevoelens en gedachten van miljarden mensen worden gekoppeld aan alomtegenwoordige machines intelligente robots en databases Ten derde is er de machtsverschuiving van het Westen naar meerdere opkomende machtscentra niet alleen staten maar ook spelers in de private sector Een vierde ontwikkeling die hij beschrijft is dat het economische kompas fundamenteel faalt en ons leidt naar een onhoudbare groei in consumptie vervuiling en uitputting van de natuurlijke grondstoffen met als belangrijke factor de hard groeiende wereldbevolking Als vijfde kracht ziet Gore de grote veranderingen die de wetenschap de geneeskunde landbouwkunde en de biotechnologie volledig op de kop zetten het is een kwestie van tijd voordat de richting van de evolutie in mensenhanden komt Ten slotte noemt Gore de radicale ontworpen van de relatie tussen de mens en de ecosystemen van de aarde samen met het begin van een revolutionaire transformatie van energiesystemen landbouw transport en bouw wereldwijd Dit is een geweldig boek Van politiek en economie tot wetenschap en de neteligste ethische kwesties Al Gore doorziet het menselijke wezen en de problemen waarmee we worden geconfronteerd Hij schrijft kraakhelder zonder vrees en zegt waar het op staat E O Wilson tweevoudig winnaar van de Pulitzerprijs Albert Arnold Al Gore is voormalig vicepresident en winnaar van de Nobelprijs voor de Vrede Hij is de oprichter van The Alliance for Climate Protection de medeoprichter van Generation Investment Management en lid van de raad van bestuur van Apple Inc en senior adviseur van Google

Ethics, Law and Society Jennifer Gunning, 2017-07-28 This key collection brings together a selection of papers commissioned and published by the Cardiff Centre for Ethics Law Society It incorporates contributions from a group of international experts along with a selection of short opinion pieces written in response to specific ethical issues The collection addresses issues arising in biomedical and medical ethics ranging from assisted reproductive technologies to the role of clinical ethics committees It examines broader societal issues with particular emphasis on sustainability and the environment and also focuses on issues of human rights in current global contexts The contributors collect responses to issues arising from high profile cases such as the legitimacy of war in Iraq to physician related suicide The volume will provide a valuable resource for practitioners and academics with an interest in ethics across a range of disciplines

Beliefs that Bias Food & Agriculture Lindsay Falvey, 2013-12-25 The book answers 10 questions addressed to the author in various forms Some are personal while others relate to global issues All are answered with candor and detailed explanation The answers will not suit those who seek confirmation of popular viewpoints nor will they suit those who insist they are doing good without having knowledge of what they are really doing But they will admirably suit those extremely important persons from all walks of life who are open to new knowledge who can accept challenges to their beliefs and received knowledge The answers cover such topics as why livestock are critical to food security why free trade and markets can't solve food shortages why aid shouldn't insist poor countries follow our model how to reconcile science and

commerce with popular ideals how gross domestic happiness can be a serious topic how more food can be produced with less land and fertilizer why labels like Buddhist and vegetarian confuse life what traditional wisdom is critical to development how misrepresentation fuels fears about climate change why small farmers and foreign agribusiness must coexist

Future Politics Jamie Susskind, 2018-09-12 Future Politics confronts one of the most important questions of our time how will digital technology transform politics and society The great political debate of the last century was about how much of our collective life should be determined by the state and what should be left to the market and civil society In the future the question will be how far our lives should be directed and controlled by powerful digital systems and on what terms Jamie Susskind argues that rapid and relentless innovation in a range of technologies from artificial intelligence to virtual reality will transform the way we live together Calling for a fundamental change in the way we think about politics he describes a world in which certain technologies and platforms and those who control them come to hold great power over us Some will gather data about our lives causing us to avoid conduct perceived as shameful sinful or wrong Others will filter our perception of the world choosing what we know shaping what we think affecting how we feel and guiding how we act Still others will force us to behave certain ways like self driving cars that refuse to drive over the speed limit Those who control these technologies usually big tech firms and the state will increasingly control us They will set the limits of our liberty decreeing what we may do and what is forbidden Their algorithms will resolve vital questions of social justice allocating social goods and sorting us into hierarchies of status and esteem They will decide the future of democracy causing it to flourish or decay A groundbreaking work of political analysis Future Politics challenges readers to rethink what it means to be free or equal what it means to have power or property what it means for a political system to be just or democratic and proposes ways in which we can and must regain control

Human Nature in an Age of Biotechnology Tamar Sharon, 2013-10-11 New biotechnologies have propelled the question of what it means to be human or posthuman to the forefront of societal and scientific consideration This volume provides an accessible critical overview of the main approaches in the debate on posthumanism and argues that they do not adequately address the question of what it means to be human in an age of biotechnology Not because they belong to rival political camps but because they are grounded in a humanist ontology that presupposes a radical separation between human subjects and technological objects The volume offers a comprehensive mapping of posthumanist discourse divided into four broad approaches two humanist based approaches dystopic and liberal posthumanism and two non humanist approaches radical and methodological posthumanism The author compares and contrasts these models via an exploration of key issues from human enhancement to eugenics to new configurations of biopower questioning what role technology plays in defining the boundaries of the human the subject and nature for each Building on the contributions and limitations of radical and methodological posthumanism the author develops a novel perspective mediated posthumanism that brings together insights in the philosophy of technology the sociology of

biomedicine and Michel Foucault's work on ethical subject constitution. In this framework, technology is neither a neutral tool nor a force that alienates humanity from itself, but something that is always already part of the experience of being human, and subjectivity is viewed as an emergent property that is constantly being shaped and transformed by its engagements with biotechnologies. Mediated posthumanism becomes a tool for identifying novel ethical modes of human experience that are richer and more multifaceted than current posthumanist perspectives allow for. The book will be essential reading for students and scholars working on ethics and technology, philosophy of technology, poststructuralism, technology and the body, and medical ethics.

Prophets of the Posthuman Christina Bieber Lake, 2013-09-30. *Prophets of the Posthuman* provides a fresh and original reading of fictional narratives that raise the question of what it means to be human in the face of rapidly developing bioenhancement technologies. Christina Bieber Lake argues that works by Nathaniel Hawthorne, Walker Percy, Flannery O'Connor, Toni Morrison, George Saunders, Marilynne Robinson, Raymond Carver, James Tiptree Jr., and Margaret Atwood must be reevaluated in light of their contributions to larger ethical questions. Drawing on a wide range of sources in philosophical and theological ethics, Lake claims that these writers share a commitment to maintaining a category of personhood more meaningful than that allowed by utilitarian ethics. *Prophets of the Posthuman* insists that because technology can never ask whether we should do something that we have the power to do, literature must step into that role. Each of the chapters of this interdisciplinary study sets up a typical ethical scenario regarding human enhancement technology and then illustrates how a work of fiction uniquely speaks to that scenario, exposing a realm of human motivations that might otherwise be overlooked or simplified. Through the vision of the writers she discusses, Lake uncovers a deep critique of the ascendancy of personal autonomy as America's most cherished value. This ascendancy, coupled with technology's glamorous promises of happiness, helps to shape a utilitarian view of persons that makes responsible ethical behavior toward one another almost impossible. *Prophets of the Posthuman* charts the essential role that literature must play in the continuing conversation of what it means to be human in a posthuman world.
