Out Of The Shadows Contributions Of Twentieth Century Women To Physics:

Out of the Shadows Nina Byers, Gary Williams, 2006-08-17 Publisher description **The Madame Curie Complex** Julie Des Jardins, 2010-03-01 The historian and author of Lillian Gilbreth examines the Great Man myth of science with profiles of women scientists from Marie Curie to Jane Goodall Why is science still considered to be predominantly male profession In *The Madame Curie Complex* Julie Des Jardin dismantles the myth of the lone male genius reframing the history of science with revelations about women s substantial contributions to the field She explores the lives of some of the most famous female scientists including Jane Goodall the eminent primatologist Rosalind Franklin the chemist whose work anticipated the discovery of DNA s structure Rosalyn Yalow the Nobel Prize winning physicist and of course Marie Curie the Nobel Prize winning pioneer whose towering mythical status has both empowered and stigmatized future generations of women considering a life in science With lively anecdotes and vivid detail *The Madame Curie Complex* reveals how women scientists have changed the course of science and the role of the scientist throughout the twentieth century They often asked different questions used different methods and came up with different groundbreaking explanations for phenomena in the natural world **A Short History of Physics in the American Century** David C. Cassidy, 2013-09-02 As the twentieth century ended computers the Internet and nanotechnology were central to modern American life Yet the physical advances underlying these applications are poorly understood and underappreciated by U S citizens In this overview Cassidy views physics through America s engagement with the political events of a tumultuous century **Women Scientists in America** Margaret W. Rossiter, 2012-02-21 The third volume of Margaret W Rossiter s landmark survey of the history of American women scientists focuses on their pioneering efforts and contributions from 1972 to the present Central to this story are the struggles and successes of women scientists in the era of affirmative action Scores of previously isolated women scientists were suddenly energized to do things they had rarely if ever done before form organizations and recruit new members start rosters and projects put out newsletters confront authorities and even fight and win lawsuits Rossiter follows the major activities of these groups in several fields from engineering to the physical biological and social sciences and their campaigns to raise consciousness see legislation enforced lobby for passage of the Equal Rights Amendment and serve as watchdogs of the media This comprehensive volume also covers the changing employment circumstances in the federal government academia industry and the nonprofit sector and discusses contemporary battles to increase the number of women members of the National Academy of Science and women presidents of scientific societies In writing this book Rossiter mined nearly one hundred previously unexamined archival collections and more than fifty oral histories With the thoroughness and resourcefulness that characterize the earlier volumes she recounts the rich history of the courageous and resolute women determined to realize their scientific ambitions *Her Space, Her Time: Women who Decoded the Universe* Shohini Ghose, 2024-01-17 Inspiring stories of long overlooked physicists and astronomers Women physicists and astronomers from

around the world have transformed science and society but the critical roles they played in their fields are not always well sung Her Space Her Time Women Who Decoded the Universe authored by award winning quantum physicist Shohini Ghose brings together the stories of these remarkable women to celebrate their indelible scientific contributions In each chapter of the book Ghose explores a scientific topic and explains how the women featured in that chapter revolutionized that area of physics and astronomy In the chapter on time we learn of Henrietta Leavitt and Margaret Burbidge who helped discover the big bang and the cosmic calendar in the chapter on space exploration we learn of Anigaduwa Cherokee aerospace scientist Mary Golda Ross who helped make the Moon landings possible and in the chapter on subatomic particles we learn of Marietta Blau Hertha Wambacher and Bibha Chowdhuri who contributed to the discovery of the building blocks of the universe and in doing so played a crucial role in determining who gets to do physics today Engaging accessible and timely this is a collective story of scientific innovation inspirational leadership and overcoming invisibility that will leave a lasting impression on any reader curious about the rule breakers and trendsetters who illuminated our understanding of the universe

Headstrong Rachel Swaby, 2015-04-07 Fifty two inspiring and insightful profiles of history's brightest female scientists Rachel Swaby's no nonsense and needed Headstrong dynamically profiles historically overlooked female visionaries in science technology engineering and math Elle In 2013 the New York Times published an obituary for Yvonne Brill It began She made a mean beef stroganoff followed her husband from job to job and took eight years off from work to raise three children It wasn't until the second paragraph that readers discovered why the Times had devoted several hundred words to her life Brill was a brilliant rocket scientist who invented a propulsion system to keep communications satellites in orbit and had recently been awarded the National Medal of Technology and Innovation Among the questions the obituary and consequent outcry prompted were Who are the role models for today's female scientists and where can we find the stories that cast them in their true light Headstrong delivers a powerful global and engaging response Covering Nobel Prize winners and major innovators as well as lesser known but hugely significant scientists who influence our every day Rachel Swaby's vibrant profiles span centuries of courageous thinkers and illustrate how each one's ideas developed from their first moment of scientific engagement through the research and discovery for which they're best known This fascinating tour reveals 52 women at their best while encouraging and inspiring a new generation of girls to put on their lab coats

The Quantum Exodus Gordon Fraser, 2012-02-23 When the Nazis came to power in 1933 they immediately expelled Jewish academics unwittingly changing the power balance of world science When war came these scientific refugees raced to engineer the atomic bomb to prevent Nazi Germany getting there first This book tells the story of how the Bomb and the Holocaust became locked in a grisly race
