Health Information Management: What Strategies? Suzanne Bakker, 2013-03-09 Health Information Management What Strategies contains the Proceedings of the Fifth European Conference on Medical and Health Libraries and gives a full account of the state of the art of European medical librarianship This book is the fifth in a well received series of proceedings of the European conferences and together

the volumes form a valuable source for medical librarians in Europe The quality of papers reflects the growth of the European Association for Health Information and Libraries EAHIL towards maturity and the ongoing professional development of its members The field of medical and health information has no geographical borders therefore medical librarianship needs to be an international and multinational cooperation The book reflects the important developments ongoing in medical informatics and medical information management These subjects are touched upon as they have a close connection to medical librarianship The future of medical libraries will be dominated by strong alliances with computer departments and health and hospital management departments Many contributions deal with the strategies medical librarians can or will develop in order to incorporate the many tools of modern information technology into library policy and practice

Systems thinking: strengthening health systems in practice Kara Durski, Karl Blanchet, Aku Kwamie, Maria Del Rocio Saenz, 2023-12-12 As health systems all over the world not only recover from COVID 19 but learn to adapt to contexts of increasing uncertainty amidst persistent challenges it is clear that systems thinking has never been needed more Systems thinking is an approach to problem solving that views problems as part of a wider dynamic system It recognizes and prioritizes the understanding of linkages relationships interactions and interdependencies among the components of a system that give rise to the system's observed behaviour Systems thinking is a philosophical frame and it can also be considered a method with its own tools Identifying ways in the short and long term which strengthen health systems is critical and applied systems thinking offers opportunities to do this Systems thinking is often considered to be a field a discipline a philosophical approach and a set of tools and methods and can be defined as a way to understand and improve complex issues and situations Despite broad consensus that systems thinking is important in health systems strengthening it remains underutilized by researchers public health practitioners and health decision makers Further a gap remains in the translation from concept to policy
