Mmup Registration Qatar:

Mega-Urbanization in the Global South Ayona Datta, Abdul Shaban, 2016-11-03 The global south is entering an Urban Age where for the first time in history more people will be living in cities than in the countryside The logics of this prediction have a dominant framing rapid urbanization uncontrolled migration resource depletion severe fuel shortages and the breakdown of law and order We are told that we must be prepared The solution is simple they say Mega urbanization is an opportunity for economic growth and prosperity Therefore we must build big build new and build fast With contributions from an international range of established and emerging scholars drawing upon real world examples Mega Urbanization in the Global South is the first to use the lens of speed to examine the postcolonial urban revolution From the mega urbanization of Lusaka to the production of satellite cities in Jakarta to new cities built from scratch in Masdar Songdo and Rajarhat this book argues that speed is now the persistent feature of a range of utopian visions that seek to expedite the production of new cities These fast cities are the enduring images of postcolonial urbanism which bypass actually existing urbanisms through new power knowledge coalitions of producing knowing and governing the city The book explores three main themes Part I examines fast cities as new urban utopias which propagate the illusion that they are quick fix sustainable solutions to insulate us from future crises Part II discusses the role of the entrepreneurial state that despite its neoliberalisation is playing a key role in shaping mega urbanization through laws policies and brute force Part III finally delves into how fast cities built by entrepreneurial states actually materialise at the scale of regional urbanization rather than as metropolitan growth This book explores the contradictions between intended and unintended outcomes of fast cities and points to their fault lines between state sovereignty capital accumulation and citizenship It concludes with a vision and manifesto for slow and decelerated urbanism This timely and original book presents urban scholars with the theoretical empirical and methodological challenges of mega urbanization in the global south as well as highlighting new theoretical agendas and empirical analyses that these new forms of city making bring to the fore Handbook on the Changing Geographies of the State Sami Moisio, Natalie Koch, Andrew E.G. Jonas, Christopher Lizotte, 2020-10-30 This authoritative Handbook presents a comprehensive analysis of the spatial transformation of the state a pivotal process of globalization It explores the state as an ongoing project that is always changing illuminating the new spaces of geopolitics that arise from these political social cultural and environmental negotiations **Predatory Urbanism** Agatino Rizzo, Anindita Mandal, 2021-06-25 Addressing the complex interrelationships between city making and the resources needed for its production Predatory Urbanism explores the link between urbanization and resources in the global South It particularly focuses on urban megaprojects highlighting these planned developments and re developments carried out by the state or state linked agencies Nation-branding in Practice Kristin Anabel Eggeling, 2020-04-29 This book investigates the political implications of country promotion through practices of nation branding by drawing on contemporary examples from the

sports urban development and higher education sector in Kazakhstan and Qatar Nation branding has emerged as a central practice of international politics where it is commonly understood as a vain superficial selling technique with little political salience Drawing on shared insights from practice theory and constructivist notions of nationalism identity and power this book challenges this reading and instead argues that nation branding is neither neutral nor primarily economically motivated but inherently politicised and tied to the legitimization of current political regimes The starting point for the analysis is a range of everyday practices and sites long ignored by international relations scholars In particular the book traces how the political leadership in Kazakhstan and Qatar have used participation in the international sports circuit spectacular urban development and the construction of world class universities to first produce and then stabilize new ideas about their state Providing a new analytical perspective on nation branding this book will be of interest to students and scholars of Middle Eastern and Central Asian studies International Relations and Cultural and Political Geography *Water, Energy & Food Sustainability in the Middle East* Sohail Murad,Elias Baydoun,Nuhad Daghir,2017-03-31 This book provides a survey of technologies available to tackle the problems associated with climate change in the energy water and food security nexus with a special focus on the Middle East It is divided into three main sections The energy Section consists of six chapters the water section of seven chapters and finally the food security section has six chapters The individual chapters are authored by experts and provide discussions and in depth views on the current status of each topic World Heritage Review ,2014 **Grand Hamad Avenue** Qatar.
