## **Mobility And Locative Media Mobile Communication In Hybrid Spaces Changing Mobilities:**

**Mobility and Locative Media** Adriana de Souza e Silva, Mimi Sheller, 2014-08-07 Mobilities has become an important framework to understand and analyze contemporary social spatial economic and political practices Especially as mobile media become seamlessly integrated into transportation networks navigating urban spaces and connecting with social networks while on the move researchers need new approaches and methods to bring together mobilities with mobile communication and locative media Mobile communication scholars have focused on cell phones often ignoring broader connections to urban spaces geography and locational media As a result they emphasized virtual mobility and personalized communication as a way of disconnecting from place location and publics The growing pervasiveness of location aware technology urges us to rethink the intersection among location mobile technologies and mobility Few studies have addressed the many transformations taking place in mobile sociality and in urban spatial processes through the appropriation of these technologies Chapter 12 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 3 0 license **The Routledge Handbook of Museums, Media and Communication** Kirsten Drotner, Vince Dziekan, Ross Parry, Kim Christian Schrøder, 2018-12-07 Museums today find themselves within a mediatised society where everyday life is conducted in a data full and technology rich context In fact museums are themselves mediatised they present a uniquely media centred environment in which communicative media is a constitutive property of their organisation and of the visitor experience The Routledge Handbook of Museums Media and Communication explores what it means to take mediated communication as a key concept for museum studies and as a sensitising lens for media related museum practice on the ground Including contributions from experts around the world this original and innovative Handbook shares a nuanced and precise understanding of media media concepts and media terminology rehearsing new locations for writing on museum media and giving voice to new subject alignments As a whole the volume breaks new ground by reframing mediated museum communication as a resource for an inclusive understanding of current museum developments The Routledge Handbook of Museums Media and Communication will appeal to both students and scholars as well as to practitioners involved in the visioning design and delivery of mediated communication in the museum It teaches us not just how to study museums but how to go about being a museum in today s world The book is available for free in PDF format as Open Access at [www.taylorfrancis.com](http://www.taylorfrancis.com) It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4 0 license *Chinese Daigou: An Ethnography of Brokerage Practices and Mobility Politics in Globalized China* Zhuoxiao Xie, 2024-12-02 This book is an ethnography of Chinese daigou cross border shopping on the behalf of mainland Chinese customers and their mobilities practices Daigou practitioners predominantly women engage in selling purchasing and delivering goods between mainland China and overseas regions With the rise of the platform economy and mobile

technologies daigou has evolved into a niche market contributing to the her economy and consumerism in China This ethnography provides a comprehensive exploration of the gendered technological practices of mobile communication and mobility politics between mainland China and Hong Kong depicting micro entrepreneurship place making and border crossing activities in three intersecting scenes Theoretically this book synthesizes the literature on mobilities science and technological studies service labor and mobile communication It offers a fresh perspective by focusing on the mobile communication that both produces and is produced by mobilities of people data objects and technologies The study expands theories of mobility politics by developing a heuristic model of brokerage theorizing the communication processes through which daigou as brokers influence manage or facilitate multiple forms and meanings of mobilities in globalized China From a feminist science and technology perspective the book examines how daigou scenarios embed gender specific concepts into technological practices reinforcing entrenched unequal gender relations in service labor and family contexts It interrogates the mechanisms of unequal mobilities associated with the logic of brokerage which strengthens the differentiation of gender technology and labor among different parties These brokerage processes multiply the discrepancies in mobilities exacerbating gaps in structural relationships and becoming significant mechanisms of inequality

*Making Mobilities Matter* Malene Freudendal-Pedersen, 2022-04-30 *Making Mobilities Matter* explores the interconnection between everyday practice and policy and planning in urban mobilities It develops a theoretical framework for understanding everyday life and its mobilities in a mobile risk society and critiques the technocratic views that still dominate transport politics and research Recognizing the importance of culture and everyday life in shaping urban mobilities it examines how contemporary communities exist expand and are sustained through localized and virtual forms of sharing responsibility exchanging life experiences creating meaning and giving ontological security to people s lives It also offers perspectives on the emotional aspect of mobilities in everyday life and how utopias can respond to these emotions *Making Mobilities Matter* ends with a discussion of the prospects for urban mobilities in the future and how these issues are vital in battling climate change *Making Mobilities Matter* is essential reading for students and researchers seeking to understand the importance of mobilities in sustainable urban development and tackling climate change

*Handbook of Urban Mobilities* Ole B. Jensen, Claus Lassen, Vincent Kaufmann, Malene

Freudental-Pedersen, Ida Sofie Gøtzsche Lange, 2020-05-18 This book offers the reader a comprehensive understanding and the multitude of methods utilized in the research of urban mobilities with cities and the urban as its pivotal axis. It covers theories and concepts for scholars and researchers to understand, observe, and analyse the world of urban mobilities. *The Handbook of Urban Mobilities* facilitates the understanding of urban mobilities within a historic conscience of societal transformation. It explores key concepts and theories within the mobilities turn with a particular urban framework as well as the methods and tools at play when empirical urban mobilities research is undertaken. This book also explores the urban mobilities practices related to commutes, particular modes of moving, the exploration of everyday life and embodied practices as they manifest themselves within urban mobilities and the themes of power, conflict, and social exclusion. A discussion of urban planning, public control, and governance is also undertaken in the book, wherein the themes of infrastructures, technologies, and design are duly considered. With chapters written in an accessible style, this handbook carries timely contributions within the contemporary state of the art of urban mobilities research. It will thus be useful for academics and students of graduate programmes and post-graduate studies within disciplines such as urban geography, political science, sociology, anthropology, urban planning, traffic and transportation planning, and architecture and urban design. [Emergence of Cross-innovation Systems](#)

Indrek Ibrus, 2019-04-04 The ebook edition of this title is Open Access and freely available to read online. This book combines economic studies of innovation systems with studies of mediatisation, media convergence, and cultural change. **Geographies of Mobility**

Mei-Po Kwan, Tim Schwanen, 2018-10-11 This book seeks to bring together different philosophical, theoretical, and methodological approaches to the study of human mobility within the discipline of geography. With five thematic sections conceptualizing and analyzing mobility inequalities, politics of mobility, decentering mobility, and qualifying abstraction, and 27 substantive chapters by leading researchers in the field, it provides a comprehensive overview of the latest thinking about human mobility and related issues. The contributors discuss mobility issues as diverse as everyday mobilities of young people, migrants, and refugees, and sex workers, the relationships between citizenship and mobility, and the potential and pitfalls of big data for understanding mobility. This, coupled with a broad international focus, means that *Geographies of Mobility* will not only encourage and enrich dialogue on a theme that is of major importance to varied geographic research communities but will also be of great interest to students and researchers across the wider social sciences. This book was originally published as a special issue of *Annals of the American Association of Geographers*. [Journalism Between Disruption and Resilience](#)

Birgit Røe Mathisen, 2022-07-26 Following recent developments in digital technologies, financial crises, and changes in audience preferences, this book addresses the critical challenges and disruptions facing the profession of journalism, an arguably precarious industry suffering from employment insecurity, individualization, and loss of autonomy. Drawing on research from the Norwegian and Nordic media landscape, *Journalism Between Disruption and Resilience* elaborates on how boundary struggles between journalism and other forms of

content such as marketing and public relations have become blurred while social distinctions within the profession are deepened and exacerbated by downsizing and cutbacks in newsrooms and their journalistic staffs. The impact of these developments on the institutional and democratic role of journalism in society is discussed alongside the tensions between professional autonomy and precarious work. Expanding upon several earlier research studies grounded in the sociology of professions and freelance work, this book provides a new theoretical framework from which to address journalistic precarity and the role of journalism in society. This is an insightful study for advanced students and researchers in the areas of professional journalism, journalism education, and media industries including marketing and public relations.

Understanding Mobilities for Designing Contemporary Cities Paola Pucci, Matteo Colleoni, 2015-12-08. This book explores mobilities as a key to understanding the practices that both frame and generate contemporary everyday life in the urban context. At the same time, it investigates the challenges arising from the interpretation of mobility as a socio-spatial phenomenon both in the social sciences and in urban studies. Leading sociologists, economists, urban planners, and architects address the ways in which spatial mobilities contribute to producing diversified uses of the city and describe forms and rhythms of different life practices, including unexpected uses and conflicts. The individual sections of the book focus on the role of mobility in transforming contemporary cities, the consequences of interpreting mobility as a socio-spatial phenomenon for urban projects and policies, the conflicts and inequalities generated by the co-presence of different populations due to mobility, and by the interests gathered around major mobility projects and the use of new data and mapping of mobilities to enhance comprehension of cities. The theoretical discussion is complemented by references to practical experiences, helping readers gain a broader understanding of mobilities in relation to the capacity to analyze, plan, and design contemporary cities.
