Modality Studies In Form And Function:

Modality Alex Klinge, Henrik Høeg Müller, 2005 *Modality Studies in Form and Function* reflects the diversity of theoretical frameworks and the heterogeneity of linguistic phenomena under the general heading of modality Researchers in the fields of logic philosophy and linguistics have for many years been pondering the elusive nature of modality and grappled with ways of capturing it The 11 studies included here cover the span from contributions that seek to clarify controversial theoretical constructs to studies which take an empirical approach to linguistic categories and cross linguistic typological issues The key concepts addressed are the structure of modal subcategories subjective vs objective modality force dynamics evidentiality Spanish and English modal auxiliaries modal uses of Italian tenses linearization patterns in German verb chains determinant TAM categories modal polyfunctionality across languages and rapport management in discourse This volume raises new questions and offers re examination of known phenomena which should provide interesting reading to linguists and students of linguistics of all theoretical persuasions

Studies on English Modality Frank Robert Palmer, 2009 Inspired by Frank Palmer's work this book addresses a set of specific topics pertaining to the description of modality in English and places them in a broader context A number of more general theoretical and typological matters are also raised which bear upon the theory of syntax semantics and pragmatics and their interfaces The methodology adopted is mostly functional typological though some reference is made to various theoretical frameworks ranging from cognitive linguistics to parametric variation Modal meanings are seen to extend beyond particular lexical and grammatical exponents through sentential semantics and into actual contexts of use At the same time the study of modality seems to challenge commonly held views on the relationship between different levels of linguistic analysis Other languages discussed include Brazilian Portuguese Classical and Modern Greek and Spanish

A Systemic Functional Study of Modality in Modern Chinese Shu Yang, 2021-12-10 This book presents a systematic and relatively comprehensive account of the system of MODALITY in Modern Chinese and the functions that realizations of modality serve in the clause and clause complex Grounded in SFL the research begins by introducing the system of types of modality in Modern Chinese investigating the subtypes of modality and their realizations The study then explores the systems of Orientations that characterize the realization of modalization and modulation in Chinese After establishing the complete system of modality in Modern Chinese the research finally examines the functions that realizations of modality serve in the textual structure of the clause and in the clause complex The study finds that the system of MODALITY is an important interpersonal clause system at the lexicogrammatical stratum of Chinese There are two distinct types of modality in Chinese modalization and modulation Modalization concerns the assessment of probability of the proposition modulation is concerned with the assessment of the proposal in terms of obligation inclination and ability The systems of ORIENTATIONS make a basic distinction between subjective and objective modality and between the explicit and implicit realizations The research also reveals that in the thematic structure of the clause realizations of modality can serve

as the interpersonal Theme in the clause in the information structure of the clause realizations of modality can function as the unmarked information focus of the clause or introduce the marked information focus and in the clause complex realizations of modality can encode modal meanings and simultaneously construct clauses into a clause complex The forms and functions of modal verbs in sections of the English tourism research articles Domínguez Morales, María Elena, 2023-03-15 The tourism research article RA has not been the focus of many studies This volume offers a description of the genre in terms of section besides an analysis of the most used language features in each section of the RA Among these are the presence of modal verbs Precisely the goal of this work is to describe their use meaning and functions in a corpus of the introduction and conclusion sections of the RA in tourist studies The compilations included texts from leading journals in the area The method of inquiry includes corpus linguistics tools to analyze texts as well as specific examples to show how these forms behave in the RAs The analysis of context is also essential in order to identify the exact meanings of modal verbs and for that reason visual inspection of each sample is mandatory The discussion of the evidence obtained is accounted for by studies in the domain of functional linguistics The conclusions show that formal variation exists in the introduction and the conclusion sections This also applies to their meanings Dynamic modality is attested to be more recurrent in the introductions and epistemic modality is preferred in the concluding sections The functions performed by these modals are varied to feature interpersonal and textual cues in the elaboration of meaning in the RA Esta obra no tiene formato impreso y su descarga es libre sin DRM *Structure and Function of the Arabic Verb* Maher Bahloul, 2007-08-07 This volume is a corpus based study that unveils the morpho syntax and the semantics of the Arabic verb *Forms and Functions of Meta-Discourse* Maria Cristina Lo Baido, 2024-07-01 This book constitutes the first systematic analysis of meta discourse in the spoken domain addressing the question of how why and when speakers switch from discourse to meta discourse by means of comment clauses e g I think The case of Present day Italian is considered exploring the internal properties of comment clauses e g morphosyntax and semantics of the verb their relations with the surrounding discourse e g position of comment clause and their prosodic profiles This study shows that speakers recur to meta discourse to convey a non random set of functions having mainly to do with the online process of reference construction e g approximation and reformulation and with the degree of speaker s commitment e g epistemicity and emphasis Comment clauses are also used as attention getting or topic resuming devices though less frequently One of the most interesting results of this study is the identification of a close relation between meta discourse and stance taking in spoken domain with speakers recurring to comment clauses to convey their attitude Finally meta discourse turns out to be highly influenced if not constrained by universal properties of the spoken domain i e non linearity **Modality, Subjectivity, and Semantic Change** Heiko Narrog, 2012-07-19 This book is a cross linguistic exploration of semantic and functional change in modal markers With a focus on Japanese and to a lesser extent Chinese the book is a countercheck to hypotheses built on the Indo European languages It also contains numerous

illustrations from other languages **The Oxford Handbook of Modality and Mood** Jan Nuyts, Johan van der Auwera, 2016-09-08 This handbook offers an in depth and comprehensive state of the art survey of the linguistic domains of modality and mood An international team of experts in the field examine the full range of methodological and theoretical approaches to the many facets of the phenomena involved Following an opening section that provides an introduction and historical background to the topic the volume is divided into five parts Parts 1 and 2 present the basic linguistic facts about the systems of modality and mood in the languages of the world covering the semantics and the expression of different subtypes of modality and mood respectively The authors also examine the interaction of modality and mood mutually and with other semantic categories such as aspect time negation and evidentiality In Part 3 authors discuss the features of the modality and mood systems in five typologically different language groups while chapters in Part 4 deal with wider perspectives on modality and mood diachrony areality first language acquisition and sign language Finally Part 5 looks at how modality and mood are handled in different theoretical approaches formal syntax functional linguistics cognitive linguistics and construction grammar and formal semantics **Epistemic Modalities and Evidentiality in**

Cross-Linguistic Perspective Zlatka Guentchéva, 2018-04-09 This volume explores phenomena which come under the heading of epistemic modalities and evidentiality in more or less well known languages Germanic Romance Balto Slavic Hungarian Tibetan Lakandon and Yucatec Maya Arwak Chibchan Kogi and Ika It reveals cross linguistic variations in the structuring of these vast fields of enquiry and clearly demonstrates the relevance and interplay of multiple factors involved in the analysis of these two conceptual domains Although the contributions present diverging descriptive traditions they are nonetheless within the broad domain of functional typological linguistics and give access to distinct yet comparable approaches They all converge around a number of key issues modal verbs the relationship between epistemic modality and evidentiality the relationship of modal notions with some tense and aspect notions the notions of inter subjectivity commitment and dis engagement the prosodic variation of modal adverbs the diachronic connections between negation and evidential markers the connection with mirativity The volume is of interest to linguists and advanced graduate students working in general and theoretical linguistics semantics pragmatics cognition and typology **Specificational and**

Predicative Clauses Wout Van Praet, 2022-07-05 In studies of copular clauses the relation between specificational and predicative clauses has been a contentious issue While most studies agree on the analysis of predicative clauses specificational clauses have sparked much debate A key concern is how specificational clauses with indefinite variable NP e g A popular holiday go to is Rome compare to and contrast with other copular clauses especially specificational clauses with definite variable NP e g The main can t miss in Italy is Rome and predicative clauses with indefinite predicate nominative e g Rome is a great city This book addresses this concern by offering a functional structural analysis of these three clause types in terms of their common characteristics and distinguishing features The analysis of the clauses structure and meaning is

substantiated by evidence from corpus research which probes into various aspects of their actual usage e.g. information structure and prosody discourse embedding. In doing so the book offers an empirical basis for testing existing assumptions about predicative and specificational clauses while also providing new insights into the interaction between the grammar and discourse usage of copular clauses.
