The book also covers all aspects of the software making it a valuable reference for users of all levels. The Complete Reference Guide is the ultimate book on 3ds Max and like Autodesk's 3D animation software it just gets better and better with each release. Whether you're new to 3ds Max or an experienced user you'll find everything you need in this complete resource. The book kicks off with a getting started section so beginners can jump in and begin working with 3ds Max right away. Experienced 3ds Max users will appreciate advanced coverage of features like crowd simulation particle systems radiosity MAXScript and more. Over 150 tutorials complete with before and after files help users at all levels build real world skills.

Autodesk 3ds Max 2021 Lighting and Shading Book Serdar Hakan DÜZGÖREN, Types of Lights 3ds Max provides two types of lights photometric and standard. All types are displayed in viewports as light objects. They share many of the same parameters including shadow generators. Photometric Lights Photometric lights use photometric light energy values that enable you to more accurately define lights as they would be in the real world. You can set their distribution intensity color temperature and other characteristics of real world lights. You can also import specific photometric files available from lighting manufacturers to design lighting based on commercially available lights. Standard Lights Standard lights are computer based objects that simulate lights such as household or office lamps the light instruments used in stage and film work and the sun itself. Different kinds of light objects cast light in different ways simulating different kinds of light sources. Unlike photometric lights Standard lights do not have physically based intensity values.
