Model-based Geostatistics Peter Diggle, Paulo Justiniano Ribeiro, 2007-05-26 This volume is the first book length treatment of model based geostatistics The text is expository emphasizing statistical methods and applications rather than the underlying mathematical theory Analyses of datasets from a range of scientific contexts feature prominently and simulations are used to illustrate theoretical results Readers can reproduce most of the computational results in the book by using the authors software package geoR whose usage is illustrated in a computation section at the end of each chapter The book assumes a working knowledge of classical and Bayesian methods of inference linear models and generalized linear models

Model-based Geostatistics for Global Public Health Peter J. Diggle, Emanuele Giorgi, 2019-03-04 Model based Geostatistics for Global Public Health Methods and Applications provides an introductory account of model based geostatistics its implementation in open source software and its application in public health research In the public health problems that are the focus of this book the authors describe and explain the pattern of spatial variation in a health outcome or exposure measurement of interest Model based geostatistics uses explicit probability models and established principles of statistical inference to address questions of this kind Features Presents state of the art methods in model based geostatistics Discusses the application these methods some of the most challenging global public health problems including disease mapping exposure mapping and environmental epidemiology Describes exploratory methods for analysing geostatistical data including diagnostic checking of residuals standard linear and generalized linear models variogram analysis Gaussian process models and geostatistical design issues Includes a range of more complex geostatistical problems where research is ongoing All of the results in the book are reproducible using publicly available R code and data sets as well as a dedicated R package This book has been written to be accessible not only to statisticians but also to students and researchers in the public health sciences The Authors Peter Diggle is Distinguished University Professor of Statistics in the Faculty of Health and Medicine Lancaster University He also holds honorary positions at the Johns Hopkins University School of Public Health Columbia University International Research Institute for Climate and Society and Yale University School of Public Health His research involves the development of statistical methods for analyzing spatial and longitudinal data and their applications in the biomedical and health sciences Dr Emanuele Giorgi is a Lecturer in Biostatistics and member of the CHICAS research group at Lancaster University where he formerly obtained a PhD in Statistics and Epidemiology in 2015 His research interests involve the development of novel geostatistical methods for disease mapping with a special focus on malaria and other tropical diseases In 2018 Dr Giorgi was awarded the Royal Statistical Society Research Prize for outstanding published contribution at the interface of statistics and epidemiology He is also the lead developer of PrevMap an R package where all the methodology found in this book has been implemented

**Geostatistical Functional Data Analysis** Jorge Mateu, Ramon Giraldo, 2021-12-13 Geostatistical Functional Data Analysis Explore the intersection between geostatistics and

functional data analysis with this insightful new reference Geostatistical Functional Data Analysis presents a unified approach to modelling functional data when spatial and spatio temporal correlations are present The Editors link together the wide research areas of geostatistics and functional data analysis to provide the reader with a new area called geostatistical functional data analysis that will bring new insights and new open questions to researchers coming from both scientific fields This book provides a complete and up to date account to deal with functional data that is spatially correlated but also includes the most innovative developments in different open avenues in this field Containing contributions from leading experts in the field this practical guide provides readers with the necessary tools to employ and adapt classic statistical techniques to handle spatial regression The book also includes A thorough introduction to the spatial kriging methodology when working with functions A detailed exposition of more classical statistical techniques adapted to the functional case and extended to handle spatial correlations Practical discussions of ANOVA regression and clustering methods to explore spatial correlation in a collection of curves sampled in a region In depth explorations of the similarities and differences between spatio temporal data analysis and functional data analysis Aimed at mathematicians statisticians postgraduate students and researchers involved in the analysis of functional and spatial data Geostatistical Functional Data Analysis will also prove to be a powerful addition to the libraries of geoscientists environmental scientists and economists seeking insightful new knowledge and questions at the interface of geostatistics and functional data analysis
