Modeling Dynamics Scientific Nonlinear Science:

Modern Research Methods for the Study of Behavior in Organizations Jose M. Cortina, Ronald S. Landis, 2013 The goal of the chapters in this SIOP Organizational Frontiers Series volume is to challenge researchers to break away from the rote application of traditional methodologies and to capitalize upon the wealth of data collection and analytic strategies available to them In that spirit many of the chapters in this book deal with methodologies that encourage organizational scientists to re conceptualize phenomena of interest e g experience sampling catastrophe modeling employ novel data collection strategies e g data mining Petri nets and or apply sophisticated analytic techniques e g latent class analysis The editors believe that these chapters provide compelling solutions for the complex problems faced by organizational researchers

Global Analysis of Dynamic Models in Economics and Finance Gian Italo Bischi, Carl Chiarella, Iryna Sushko, 2012-08-07 The essays in this special volume survey some of the most recent advances in the global analysis of dynamic models for economics finance and the social sciences They deal in particular with a range of topics from mathematical methods as well as numerous applications including recent developments on asset pricing heterogeneous beliefs global bifurcations in complementarity games international subsidy games and issues in economic geography A number of stochastic dynamic models are also analysed The book is a collection of essays in honour of the 60th birthday of Laura Gardini

Scientific and Technical Aerospace Reports, 1994 Research in Computer Science in the Bulgarian Academy of Sciences Krassimir T. Atanasov, 2021-07-19 This book is a collection of papers devoted to the emergence and development in Bulgarian Academy of Sciences of some of the areas of informatics including artificial intelligence The papers are prepared by specialists from the Academy some of whom are among the founders of these scientific and application areas in Bulgaria and in some cases in the world The book is interesting for specialists in informatics and computer science and researchers in history of sciences

Handbook of Research on Artificial Intelligence Techniques and Algorithms Vasant, Pandian, 2014-11-30 For decades optimization methods such as Fuzzy Logic Artificial Neural Networks Firefly Simulated annealing and Tabu search have been capable of handling and tackling a wide range of real world application problems in society and nature Analysts have turned to these problem solving techniques in the event during natural disasters and chaotic systems research The Handbook of Research on Artificial Intelligence Techniques and Algorithms highlights the cutting edge developments in this promising research area This premier reference work applies Meta heuristics Optimization MO Techniques to real world problems in a variety of fields including business logistics computer science engineering and government This work is particularly relevant to researchers scientists decision makers managers and practitioners

Handbook of Research on Modeling, Analysis, and Control of Complex Systems Azar, Ahmad Taher, Kamal, Nashwa Ahmad, 2020-12-05 The current literature on dynamic systems is quite comprehensive and system theory s mathematical jargon can remain quite complicated Thus there is a need for a compendium of accessible research that involves the broad

range of fields that dynamic systems can cover including engineering life sciences and the environment and which can connect researchers in these fields The Handbook of Research on Modeling Analysis and Control of Complex Systems is a comprehensive reference book that describes the recent developments in a wide range of areas including the modeling analysis and control of dynamic systems as well as explores related applications The book acts as a forum for researchers seeking to understand the latest theory findings and software problem experiments Covering topics that include chaotic maps predictive modeling random bit generation and software bug prediction this book is ideal for professionals academicians researchers and students in the fields of electrical engineering computer science control engineering robotics power systems and biomedical engineering Climate Modeling for Scientists and Engineers John B. Drake,2014-01-01 Climate modeling and simulation teach us about past present and future conditions of life on earth and help us understand observations about the changing atmosphere and ocean and terrestrial ecology Focusing on high end modeling and simulation of earth s climate Climate Modeling for Scientists and Engineers presents observations about the general circulations of the earth and the partial differential equations used to model the dynamics of weather and climate covers numerical methods for geophysical flows in more detail than many other texts discusses parallel algorithms and the role of high performance computing used in the simulation of weather and climate and provides supplemental lectures and MATLAB exercises on an associated Web page Directory of Research Grants 2008 Schoolhouse Partners Llc,2008-05 It was the 50s and life was simple until September 25 1954 That was the night that would be etched in the memory of the citizens of Stanfield Massachusetts The Chief of Police described the brutal savagery of the double homicide as the most atrocious crime in the history of the city A fourteen year old girl and the four year old boy in her care were murdered at the hands of a deranged depraved killer A Thread of Evidence places the reader at the scene of the crime an eye witness to the senseless stabbing of two innocent children With a piece of crochet thread as their only clue the entire police department lead by detectives Steven Logan and Raymond Gage scour the city in search of a maniacal savage When all tips and leads have been exhausted they review all evidence They come back to the thread The only real evidence With tenacity and perseverance of Logan and Gage the killer is apprehended The reader experiences the twists and turns of the investigation and ultimately occupies a reserved seat in the Superior Court as the trial proceedings commence A Thread of Evidence has been written as fiction but inspired by an actual event Fifty years later it remains etched in the minds of all who had lived in the area The author has researched court records newspapers interviewed neighbors police and has drawn on personal recollections of the crime The story has been recounted over and over and to this day it continues to be discussed A Thread of Evidence is a compelling account of superb detective work and unprecedented dedication of an entire police department *Dynamic Modeling of Complex Industrial Processes: Data-driven Methods and Application Research* Chao Shang,2018-02-22 This thesis develops a systematic data based dynamic modeling framework for industrial processes in keeping with the slowness

principle Using said framework as a point of departure it then proposes novel strategies for dealing with control monitoring and quality prediction problems in industrial production contexts The thesis reveals the slowly varying nature of industrial production processes under feedback control and integrates it with process data analytics to offer powerful prior knowledge that gives rise to statistical methods tailored to industrial data It addresses several issues of immediate interest in industrial practice including process monitoring control performance assessment and diagnosis monitoring system design and product quality prediction In particular it proposes a holistic and pragmatic design framework for industrial monitoring systems which delivers effective elimination of false alarms as well as intelligent self running by fully utilizing the information underlying the data One of the strengths of this thesis is its integration of insights from statistics machine learning control theory and engineering to provide a new scheme for industrial process modeling in the era of big data
