Modeling Messages The Architect And The Model:

Modeling Messages Karen Moon, 2005 The model is one of the oldest means of architectural representation and comes in an extravagant variety of forms from miniaturizations of reality mesmerizing in their exactness to wildly energetic sculptural representations Modeling Messages The Architect and the Model is a study of the contemporary model American and international and its myriad uses in architectural practice Among the illustrations are inventive designs by architects Peter Eisenman Frank Gehry Zaha Hadid and Rem Koolhaas Author Karen Moon discusses the meaning of the model for the architect the relationship between model and building and the impact of scale She also explores how architects use models for presentation and the creation of a public image In addition she focuses on the practice of model making the relationship between the architect and the maker the materials and new technologies that are transforming model making **The Architectural Models of Theodore Conrad** Teresa Fankhänel, 2021-06-17 Based on the recent discovery of his fully preserved private archive models photos letters business files and drawings this book tells the story of Theodore Conrad 1910 1994 the most prominent and prolific architectural model maker of the 20th century Conrad s innovative models were instrumental in the design and realization of many icons of American Modernism from the Rockefeller Center to Lever House and the Seagram Building He revolutionized the production of architectural models and became a model making entrepreneur in his own right Yet despite his success and the well known buildings he helped to create until now little has been known about Conrad s work and his impact on 20th century architectural history With exclusive access to Conrad s archive as well as that of model photographer Louis Checkman both of which have lain undiscovered in private storage for decades this book examines Conrad s work and legacy accompanied by case studies of his major commissions and full color photographs of his works Set against the backdrop of the surge in model making in the 1950s and 1960s which Jane Jacobs called The Miniature Boom it explores how Conrad s models prompt broader scholarly questions about the nature of authorship in architecture the importance of craftsmanship and about the translation of architectural ideas between different media The book ultimately presents an alternative history of American modern architecture highlighting the often overlooked influence of architectural models and their makers *Architecture's Model Environments* Lisa Moffitt, 2023-02-20 Seen through the distilling lens of the architectural model *Architecture's Model Environments* is a novel and far reaching exploration of the many dialogues buildings have with their environmental surroundings Expanding on histories of building technology the book sheds new light on how physical models conventionally understood as engineering experimentation devices enable architectural design speculation The book begins with a catalogue of ten original model prototypes of wind tunnels water tables and filling boxes and is the first of its kind to establish an architectural approach to fabricating such environmental models Subsequent chapters feature three precedent models that have been largely overlooked within the wider oeuvres of their authors French polymath tienne Jules Marey s 1900 2 wind tunnels Hungarian American architects

Victor and Aladar Olgyai's 1955 63 thermoheliodon and Scottish chemist and building ventilation expert David Boswell The Ventilator Reid's 1844 test tube convection experiments Moving between historic moments and the present day between case studies and original prototypes the book reveals the potent ability for models as both physical artefacts and mental ideals to reflect prevailing cultural views about the world and to even reshape those views Fundamentally Architecture's Model Environments illustrates how environmental models reveal design insights across scales from the seam that leaks to the body that feels to the building that mediates to the world that immerses *Models of Understanding Text* Bruce K. Britton, Arthur C. Graesser, 1996 First Published in 1995 Routledge is an imprint of Taylor Francis an informa company *Architectural Modelmaking Second Edition* Nick Dunn, 2014-09-08 The physical model is an important communication tool for architects Although the proliferation of CAD programs has enabled the creation of increasingly complex computer models and virtual environments there is also a growing need to address the three dimensional qualities of architecture that may be lost when using such media This book focuses on the inspiring possibilities for modelling the built environment with all the different media and techniques available In describing the use of different models in different contexts the book provides a practical guide to how and why models are used and what they are used for This second edition includes more detailed step by step exercises expanded discussion of materials and techniques updated coverage of digital techniques and new case studies
