Modern Architecture By William Curtis:

Modern Architecture Since 1900 William J. R. Curtis, 1987 A penetrating analysis of the modern architectural tradition and its origins Since its first publication in 1982 *Modern Architecture Since 1900* has become established as a contemporary classic Worldwide in scope it combines a clear historical outline with masterly analysis and interpretation Technical economic social and intellectual developments are brought together in a comprehensive narrative which provides a setting for the detailed examination of buildings Throughout the book the author's focus is on the individual architect and on the qualities that give outstanding buildings their lasting value For the third edition the text has been radically revised and expanded incorporating much new material and a fresh appreciation of regional identity and variety Seven chapters are entirely new including expanded coverage of recent world architecture Described by James Ackerman of Harvard University as immeasurably the finest work covering this field in existence this book presents a penetrating analysis of the modern tradition and its origins tracing the creative interaction between old and new that has generated such an astonishing richness of architectural forms across the world and throughout the century [Modern Architecture and the Mediterranean](#) Jean-Francois Lejeune, Michelangelo Sabatino, 2009-12-04 Considering the influence of the forms and tectonics of the Mediterranean vernacular on modern architectural practice and discourse from the 1920s to the 1960s *Modern Architecture* Adam Sharr, 2018-11-15 Somewhere between 1910 and 1970 architecture changed Now that modern architecture has become familiar sometimes celebrated sometimes vilified it's hard to imagine how novel it once seemed Expensive buildings were transformed from ornamental fancies which referred to the classical and medieval pasts into strikingly plain reflections of novel materials functions and technologies Modern architecture promised the transformation of cities from overcrowded conurbations characterised by packed slums and dirty industries to spacious realms of generous housing and clean mechanised production set in parkland At certain times and in certain cultures it stood for the liberation of the future from the past This Very Short Introduction explores the technical innovations that opened up the cultural and intellectual opportunities for modern architecture to happen Adam Sharr shows how the invention of steel and reinforced concrete radically altered possibilities for shaping buildings transforming what architects were able to imagine as did new systems for air conditioning and lighting While architects weren't responsible for these innovations they were among the first to appreciate how they could make the world look and feel different in connection with imagery from other spheres like modern art and industrial design Focusing on a selection of modern buildings that also symbolize bigger cultural ideas Sharr discusses what modern architecture was like why it was like that and how it was imagined Considering the work of some of the historians and critics who helped to shape modern architecture he demonstrates how the field owes as much to its storytellers as to its buildings ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new

subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

The New Architecture of Mexico John V. Mutlow,2005 This book explores the modern architecture of Mexico with an emphasis from the early 1980s to the present day It is particularly appropriate now given a renewed interest in the recent modern architecture of Mexico and as the w

Utopias and Architecture Nathaniel Coleman,2007-05-07 Utopian thought though commonly characterized as projecting a future without a past depends on golden models for re invention of what is Through a detailed and innovative re assessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers Coleman offers the reader a unique perspective of idealism in architectural design With unparalleled depth and focus of vision on the work of Le Corbusier Louis I Kahn and Aldo van Eyck this book persuasively challenges predominant assumptions in current architectural discourse forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hyper modern stance and orthodox modernist architecture

Thinking Through Twentieth-Century Architecture Nicholas Ray,2023-02-08 Shortlisted for the Architectural Book Awards 2024 Thinking Through Twentieth Century Architecture connects the practice of architecture with its recent history and its theoretical origins those philosophical ideas that lay behind modernism and its aftermath By analyzing in straightforward and jargon free language the genesis of modernism and the complex reactions to it the book clarifies a continuing debate It has been specifically written to connect issues of theory history and contemporary practice and to allow students to make these connections easily This is a history of twentieth century architecture written with close critical attention to the theories that lie behind the works described Importantly unlike other historical accounts it does not take sides and urge the reader to identify with one strand of thinking or style of architecture at the expense of others but it presents a dispassionate view with persuasive arguments on behalf of different positions It pursues the history of European and American architecture chronologically but the history is interwoven with the philosophical ideas that informed both writers and architects and are essential for its understanding The book is relevant to current issues of contemporary practice and education showing that philosophical issues are fundamental and those relating to design decisions never go away It includes 200 illustrations and will appeal to all those interested in twentieth century architecture and to architectural students

Beyond Modernist Masters Felipe Hernández,2009-11-20 Latin America has been an important place for architecture for many decades Masters like Barrag n Dieste Lina Bo Bardi and Niemeyer pointed the way for architectural design all over the world and they continue to do so today Their approach to colors materials and walls had a deep and lasting influence on architectural modernism Since then however and especially in the last fifteen years architecture on the continent has continued to evolve and a lively and extremely creative architecture scene has developed The work of Latin American architects and city planners is often guided by social issues for example the approach to informal settlements on

the outskirts of big cities the scarcity of housing and public space the availability of affordable transportation and the important role of cultural infrastructure such as schools libraries and sports facilities as a catalyst for neighborhoods Within this context the book considers numerous projects that have prompted discussion and provided fresh impetus all across Latin America Outstanding projects like the Santo Domingo Library in Medellin Colombia by Giancarlo Mazzanti Alberto Kalach s Liceo Franco Mexicano in Mexico and the works of Alejandro Aravena in Chile show that recent Latin American architecture is more than capable of holding its own beside the works of the founders Felipe Hernandez is an architect and professor of Architectural Design History and Theory at The University of Liverpool He attended an MA in Architecture and Critical Theory graduating with distinction in 1998 and received his PhD from the University of Nottingham in 2003 He has taught at the Bartlett School of Architecture UCL The Universities of Nottingham Sheffield East London and Nottingham Trent in the United Kingdom as well as at Brown University and Roger Williams University in USA Felipe has published numerous essays and articles examining the situation of contemporary Latin American cities and revealing the multiplicity of architectural practices that operate simultaneously in the constant re shaping of the continent s cities

Site Matters Carol Burns, Andrea Kahn, 2005 This volume through theoretical essays and empirically grounded pieces on Le Corbusier s designs contemporary suburbs and the planning agendas of the World Trade Center site provides theory on the appreciation of site and context in architecture

The New Tenement Florian Urban, 2017-10-12 This book examines new tenements dense medium rise multi storey residences that have been the backbone of European inner city regeneration since the 1970s and came with a new positive view on urban living Focusing principally on Berlin Copenhagen Glasgow Rotterdam and Vienna it relates architectural design to an evolving intellectual framework that mixed anti modernist criticism with nostalgic images and strategic goals and absorbed ideas about the city as a generator of creativity locale of democratic debate and object of personal identification This book analyses new tenements in the context of the post functionalist city and its mixed use neighbourhoods redeveloped industrial sites and regenerated waterfronts It demonstrates that these buildings are both generators and outcome of an urban environment characterised by information exchange rather than industrial production individual expression rather than mass culture visible history rather than comprehensive renewal and conspicuous difference rather than egalitarianism It also shows that new tenements evolved under a welfare state that all over Europe has come under pressure but still to a certain degree balances and controls heterogeneity and economic disparities

Climax Change! Pedro Gadanho, 2022-05-25 Climax Change represents the much needed overview of how climate change and the current environmental emergency will affect the practice of architecture both in terms of its design philosophy and rising opportunities to innovate and radically transform the current tenet of architecture s aesthetic ethical and professional drives Climax Change offers an overview of how the current environmental emergency will impact the practice of architecture At a crossroads in which the construction sector and built environment produce nearly 40% of greenhouse gases accountable for

global warming architects are just starting to acknowledge their complicity in an impending disaster In need of a paradigm shift similar to that of the Modern Movement architecture desperately requires clear guidelines and targets so as to operate its inevitable transformation towards an ecologically friendly design logic From historical analyses of ecocide or the environmental avant gardes to topics such as decarbonization degrowth the Great Transition and the aspirations of Green New Deals this book features ten essays around today s climate change debates bringing them home to architectural thinking
