explanations their theories are based on largely identical research findings in particular a strong negative relationship between education and authoritarianism Unobstructed by the conclusions these authors felt called upon to draw from the findings themselves Houtman configures them in a new way The hypotheses derived from this new theory allow for a systematic strict and competitive testing of original theses without ignoring the value of and earlier research After demonstrating that authoritarianism and libertarianism cannot be explained by class or economic background Houtman examines the implications of this argument for today s death of class debate in political sociology He holds it to be unfortunate that the relevance of class to politics is typically addressed by studying the relation between class and voting This conceals a complex cross pressure mechanism that causes this relationship to capture the net balance of class voting and its opposite cultural voting instead of class voting He argues that references to a decline in class voting may be basically correct but dogmatic reliance on the relation between class and voting to prove the point systematically underestimates levels of class voting and produces an exaggerated picture of the decline Dick Houtman has an eye for the critical gap in our grand theorizing and like the classic Dutchman has filled the gap This book we must all read to find how better to fill the gaps in our own theorizing about culture class and politics Terry Nichols Clark University of Chicago Dick Houtman is professor of sociology at the Erasmus University Rotterdam the Netherlands Fire Management Notes ,1970 Fire Management Today ,2000
