Modern Chinese Warfare, 1795-1989 Bruce A. Elleman, 2001 A survey of Chinese warfare both internal and international from the opium wars of the 1840s through to the end of Vietnam *China's Energy Strategy* Gabriel B Collins, Andrew S. Erickson, William S. Murray, Lyle J Goldstein, 2012-04-30 A variety of viewpoints is offered in this timely analysis of China's economy and the future shape of Beijing's energy consumption The authors all noted authorities in the fields of economics diplomacy energy and defense consider an unprecedented range of influences and factors to avoid the limitations of looking at the subject myopically or with political bias They conclude that while energy insecurity could eventually lead to an arms race at sea or even a naval conflict that neither side wants there is ample room for Sino American energy dialogue and cooperation in the maritime domain China's Use of Military Force in Foreign Affairs Markus B. Liegl, 2017-03-16 This book explains why China has resorted to the use of large scale military force in foreign affairs How will China use its growing military might in coming crisis and existing conflicts This book contributes to the current debate on the future of the Asia Pacific region by examining why China has resorted to using military force in the past Utilizing fresh theoretical insights on the causes of interstate war and employing a sophisticated methodological framework the book provides detailed analyses of China's intervention in the Korean War the Sino Indian War China's border clashes with the Soviet Union and the Sino Vietnamese War It argues that China did not employ military force in these wars for the sake of national security or because of material issues under contestation as frequently claimed Rather the book's findings strongly suggest that considerations about China's international status and relative standing are the principal reasons for China's decision to engage in military force in these instances When reflecting the study's central insight back onto China's contemporary territorial conflicts and problematic bilateral relationships it is argued that the People's Republic is still a status seeking and thus highly status sensitive actor As a result China's status ambitions should be very carefully observed and well taken into account when interacting with the PRC This book will be of much interest to students of Chinese foreign policy Asian politics military and strategic studies and IR in general *China at War* Xiaobing Li, 2012-01-10 This comprehensive volume traces the Chinese military and its experiences over the past 2 500 years describing clashes with other kingdoms and nations as well as internal rebellions and revolutions As the first book of its kind *China at War* An Encyclopedia expands far beyond the conventional military history book that is focused on describing key wars battles military leaders and influential events Author Xiaobing Li an expert writer in the subjects of Asian history and military affairs provides not only a broad chronological account of China's long military history but also addresses Chinese values concepts and attitudes regarding war As a result readers can better understand the wider sociopolitical history of the most populous and one of the largest countries in the world and grasp the complex security concerns and strategic calculations often behind China's decision making process This encyclopedia contains an introductory essay written to place the reference entries

within a larger contextual framework allowing students to compare Chinese with Western and American views and approaches to war Topics among the hundreds of entries by experts in the field include Sunzi's classic *The Art of War* Mao Zedong's guerrilla warfare in the 20th century Chinese involvement in the Korean War and Vietnam War and China's nuclear program in the 21st century **Taiwan's Offshore Islands** Bruce A. Gunboats, Empire and the China Station Matthew Heaslip, 2020-10-01 Examining Britain's imperial outposts in 1920s East Asia this book explores the changes and challenges affecting the Royal Navy's third largest fleet the China Station as its crews fought to hold back the changing tides of fortune Bridging the gap between high level naval strategy and everyday imperial culture Heaslip highlights the importance of the China Station to the British imperial system foreign policy and East Asian geopolitics while also revealing the lived experiences of these imperial outposts Following their immersion into a new world and the challenges they encountered along the way it considers how its naval officers were perceived by the Chinese populations of the ports they visited how the two communities interacted and what this meant at a time of peace Against the changing nature of Britain's informal empire in the 1920s *Gunboats Empire and the China Station* highlights the complex nature of naval operations in between major conflicts and calls into question how peaceful this peacetime truly was

China's Battle for Korea Xiaobing Li, 2014-05-28 Between November 1950 and the end of fighting in June 1953 China launched six major offensives against UN forces in Korea The most important of these began on April 22 1951 and was the largest Communist military operation of the war The UN forces put up a strong defense prevented the capture of the South Korean capital of Seoul and finally pushed the Chinese back above the 38th parallel After China's defeat in this epic five

week battle Mao Zedong and the Chinese leadership became willing to conclude the war short of total victory China's Battle for Korea offers new perspectives on Chinese decision making planning and execution the roles of command political control and technology and the interaction between Beijing Pyongyang and Moscow while providing valuable insight into Chinese military doctrine and the reasons for the UN's military success [The 1929 Sino-Soviet War](#) Michael Walker, 2021-02-01 For seven weeks in 1929 the Republic of China and the Soviet Union battled in Manchuria over control of the Chinese Eastern Railroad It was the largest military clash between China and a Western power ever fought on Chinese soil involving more than a quarter million combatants Michael M Walker's *The 1929 Sino-Soviet War* is the first full account of what UPI's Moscow correspondent called the war nobody knew a limited modern war that destabilized the region's balance of power altered East Asian history and sent grim reverberations through a global community giving lip service to demilitarizing in the wake of World War I Walker locates the roots of the conflict in miscalculations by Chiang Kai-shek and Chang Hsueh-liang about the Soviets' political and military power flawed assessments that prompted China's attempt to reassert full authority over the CER The Soviets on the other hand were dominated by a Stalin eager to flex some military muscle and thoroughly convinced that war would win much more than petty negotiations This was in fact Walker shows a watershed moment for Stalin his regime and his still young and untested military disproving the assumption that the Red Army was incapable of fighting a modern war By contrast the outcome revealed how unprepared the Chinese military forces were to fight either the Red Army or the Imperial Japanese Army their other primary regional competitor And yet while the Chinese commanders proved weak Walker sees in the toughness of the overmatched infantry a hint of the rising nationalism that would transform China's troops from a mercenary army into a formidable professional force with powerful implications for an overconfident Japanese Imperial Army in 1937 Using Russian Chinese and Japanese sources as well as declassified US military reports Walker deftly details the war from its onset through major military operations to its aftermath giving the first clear and complete account of a little known but profoundly consequential clash of great powers between the World Wars
