Modeling Decisions Information Fusion And Aggregation Operators Cognitive Technologies:

Modeling Decisions Vicenç Torra, Yasuo Narukawa, 2007-05-11 Information fusion techniques and aggregation operators produce the most comprehensive specific datum about an entity using data supplied from different sources thus enabling us to reduce noise increase accuracy summarize and extract information and make decisions These techniques are applied in fields such as economics biology and education while in computer science they are particularly used in fields such as knowledge based systems robotics and data mining This book covers the underlying science and application issues related to aggregation operators focusing on tools used in practical applications that involve numerical information Starting with detailed introductions to information fusion and integration measurement and probability theory fuzzy sets and functional equations the authors then cover the following topics in detail synthesis of judgements fuzzy measures weighted means and fuzzy integrals indices and evaluation methods model selection and parameter extraction The methods are illustrated with representative examples throughout and there are extensive bibliographies and reading suggestions The book is intended for graduate students researchers and practitioners such as engineers computer scientists statisticians and economists who use decision models and aggregation operators The reader is assumed to have a nonspecialized background in mathematics

New Trends in Aggregation Theory Radomír Halaš, Marek Gagolewski, Radko Mesiar, 2019-05-16 This book collects the contributions presented at AGOP 2019 the 10th International Summer School on Aggregation Operators which took place in Olomouc Czech Republic in July 2019 It includes contributions on topics ranging from the theory and foundations of aggregation functions to their various applications Aggregation functions have numerous applications including but not limited to data fusion statistics image processing and decision making They are usually defined as those functions that are monotone with respect to each input and that satisfy various natural boundary conditions In particular settings these conditions might be relaxed or otherwise customized according to the user's needs Noteworthy classes of aggregation functions include means t norms and t conorms uninorms and nullnorms copulas and fuzzy integrals e.g. the Choquet and Sugeno integrals This book provides a valuable overview of recent research trends in this area **Aggregation Functions**

Michel Grabisch, Jean-Luc Marichal, Radko Mesiar, Endre Pap, 2009-07-09 Aggregation is the process of combining several numerical values into a single representative value and an aggregation function performs this operation These functions arise wherever aggregating information is important applied and pure mathematics probability statistics decision theory functional equations operations research computer science and many applied fields economics and finance pattern recognition and image processing data fusion etc This is a comprehensive rigorous and self contained exposition of aggregation functions Classes of aggregation functions covered include triangular norms and conorms copulas means and averages and those based on nonadditive integrals The properties of each method as well as their interpretation and analysis are studied in depth together with construction methods and practical identification methods Special attention is given to the

nature of scales on which values to be aggregated are defined ordinal interval ratio bipolar It is an ideal introduction for graduate students and a unique resource for researchers

Decision Support Systems - Collaborative Models and Approaches in Real Environments Hernandez Jorge, Pascale Zarate, Fatima Dargam, Boris Delibašić, Shaofeng Liu, Rita Ribeiro, 2012-07-26 This book contains extended and revised versions of a set of selected papers from two workshops organized by the Euro Working Group on Decision Support Systems EWG DSS which were held in London and Paris in June and November 2011 respectively The workshop themes were Decision Support Systems and Collaborative Decision Making The 11 papers were selected from 52 submissions and are representative of the current research in these fields They address challenges such as conceptual models software specification and simulation collaborative requirements specification as well as multi objective and multi criteria decision making

Springer Handbook of Computational Intelligence Janusz Kacprzyk, Witold Pedrycz, 2015-05-28 The Springer Handbook for Computational Intelligence is the first book covering the basics the state of the art and important applications of the dynamic and rapidly expanding discipline of computational intelligence This comprehensive handbook makes readers familiar with a broad spectrum of approaches to solve various problems in science and technology Possible approaches include for example those being inspired by biology living organisms and animate systems Content is organized in seven parts foundations fuzzy logic rough sets evolutionary computation neural networks swarm intelligence and hybrid computational intelligence systems Each Part is supervised by its own Part Editor s so that high quality content as well as completeness are assured

Handbook of Research on Artificial Intelligence Techniques and Algorithms Vasant, Pandian, 2014-11-30 For decades optimization methods such as Fuzzy Logic Artificial Neural Networks Firefly Simulated annealing and Tabu search have been capable of handling and tackling a wide range of real world application problems in society and nature Analysts have turned to these problem solving techniques in the event during natural disasters and chaotic systems research The Handbook of Research on Artificial Intelligence Techniques and Algorithms highlights the cutting edge developments in this promising research area This premier reference work applies Meta heuristics Optimization MO Techniques to real world problems in a variety of fields including business logistics computer science engineering and government This work is particularly relevant to researchers scientists decision makers managers and practitioners

Fuzzy TOPSIS Mohamed El Alaoui, 2021-05-26 This book aims to justify the use of fuzzy logic as a logic and as an uncertainty theory in the decision making context It also discusses the development of the TOPSIS method Technique for Order of Preference by Similarity to Ideal Solution with related examples and MATLAB codes This is the first book devoted to TOPSIS and its fuzzy versions It presents the use of fuzzy logic as a logic and as an uncertainty theory in the decision making content and discusses the development of the TOPSIS method in classical and fuzzy context The book justifies the use of fuzzy logic as an uncertainty theory and provides illustrative examples for each fuzzy TOPSIS extension along with related MATLAB codes and case studies This book is for industrial engineers operations

research engineers systems engineers and production engineers working in the areas of decision analysis multi criteria decision making and multiple objective optimization

Neural Preprocessing and Control of Reactive Walking

Machines Poramate Manoonpong, 2007-05-10 This book presents biologically inspired walking machines interacting with their physical environment and shows how the morphology and behavior control of machines can benefit from biological studies The purpose is to develop a modular structure of neural control generating reactive behaviors of the physical walking machines to analyze the neural mechanisms underlying them and to demonstrate the sensor fusion technique leading to smooth switching between appropriate behaviors like obstacle avoidance and sound tropism

Neutrosophic Sets and Systems, Vol. 34, 2020. Special Issue: Social Neutrosophy in Latin America Florentin Smarandache, Mohamed

Abdel-Basset, Maikel Leyva Vazquez, Neutrosophy as science has inclusive attributes that make possible to extract the contributions of neutral values in the analysis of data sets it builds a unified field of logic for transdisciplinary studies that transcend the boundaries between natural and social sciences Neutral philosophy seeks to solve the problems of indeterminacy that appear universally to reform the current natural or social sciences with an open methodology to promote innovation The research products related in this special issue start from the premise that the difficulty is not the complexity of the social environment but the instrumental obsolescence to observe interpret and manage that complexity there are bold approaches and proposals for valid solutions that come to enrich the universe of resolution through the use of neutral methods In the last year the use of tools related to neutrosophy and its application to the social sciences modeling of social phenomena based on simulation agents problems associated with health psychology education environmental management and sustainability solutions and legal sciences has increased in the events organized by the Asociacion Latinoamericana de Ciencias Neutrosoficas ALCN in Spanish The methods of higher incidence are cognitive maps neutral Iadovs neutral Delphi analytical hierarchy process methods neutral statistics neutral personality models among the most significant In this special issue there is a predominance of research from Ecuadorian universities demonstrating how neutrosophy and its methods are consolidated as instruments of analysis inference and research validation

Soft Computing Approach for Mathematical Modeling of Engineering Problems Ali Ahmadian, Soheil Salahshour, 2021-09-02 This book describes different mathematical modeling and soft computing techniques used to solve practical engineering problems It gives an overview of the current state of soft computing techniques and describes the advantages and disadvantages of soft computing compared to traditional hard computing techniques Through examples and case studies the editors demonstrate and describe how problems with inherent uncertainty can be addressed and eventually solved through the aid of numerical models and methods The chapters address several applications and examples in bioengineering science drug delivery solving inventory issues Industry 4 0 augmented reality and weather forecasting Other examples include solving fuzzy shortest path problems by introducing a new distance and ranking functions Because in practice problems arise with uncertain data and most of

them cannot be solved exactly and easily the main objective is to develop models that deliver solutions with the aid of numerical methods This is the reason behind investigating soft numerical computing in dynamic systems Having this in mind the authors and editors have considered error of approximation and have discussed several common types of errors and their propagations Moreover they have explained the numerical methods along with convergence and consistence properties and characteristics as the main objectives behind this book involve considering discussing and proving related theorems within the setting of soft computing This book examines dynamic models and how time is fundamental to the structure of the model and data as well as the understanding of how a process unfolds Discusses mathematical modeling with soft computing and the implementations of uncertain mathematical models Examines how uncertain dynamic systems models include uncertain state uncertain state space and uncertain state s transition functions Assists readers to become familiar with many soft numerical methods to simulate the solution function s behavior This book is intended for system specialists who are interested in dynamic systems that operate at different time scales The book can be used by engineering students researchers and professionals in control and finite element fields as well as all engineering applied mathematics economics and computer science interested in dynamic and uncertain systems Ali Ahmadian is a Senior Lecturer at the Institute of IR 40 The National University of Malaysia Soheil Salahshour is an associate professor at Bahcesehir University
