Police Analysis and Planning for Homicide Bombings Ellis John,2007 Police Analysis and Planning for Homicide Bombings is oriented toward planning police operations in the public sector but will be usable by other public officials as well as by some military and private sector police operations It addresses police threat assessment of vulnerability assessment to defense against and response to attacks by homicide bombs It begins with an essay on the distinctions between military and

police operations and includes an examination of the U S counter terrorist policy and structure assessment of explosive weapons of mass destruction and the terrorist ability to make and use them the legal limitations of police response operations in the United States and defensive response to this form of attack It concludes with commentary on actions that may be needed if this threat continues to develop in the United States Relying upon both experience and research the author has synthesized the varied military law enforcement and private security approaches into a detailed analysis of the threat posed by terrorist use of homicide bombs and the necessary internal response With the first hand experience of applying the knowledge in an actual threat environment the combination of historical perspective and reality confrontation produces an effective examination of the topic for the police administrator and emergency planner
