Three-component Universal Remote

Congratulations on your purchase of this three-component universal remote. This universal remote controls up to three electronic components and makes managing remote controls a thing of the past. Your remote is guaranteed to work with all brands of components. The three-component universal remote is easy to use, easy to program, and gives you control at the touch of your fingertips.

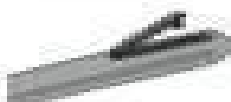

SAVE THIS MANUAL AND THE CODE LIST

Once you've set up your remote, you don't want to lose your copy of this manual. Make sure you keep the manual and code list in a safe place so that you can reprogram the remote if you need to.

Tip: The three-component universal remote is already programmed to operate most RCA, GE and PROSCENI-branded TVs, VCRs, DVD players and satellite receivers. Just press the corresponding key—TV for a television, SATELLITE for a satellite receiver.

Battery Installation and Information

Your universal remote requires two AAA alkaline batteries. Batteries may or may not be included, depending on model.

To install the batteries

1. Remove the battery compartment cover.
2. Insert the batteries, matching the battery to the (+) and (-) marks inside the battery compartment.
3. Push the battery cover back into place.

Note: If you are replacing batteries, try not to press any buttons after you've taken the old batteries out. Pressing buttons while replacing batteries causes the remote to shut off shortly after the replacement. You will need to program the remote again.

Battery Precautions

- Do not mix old and new batteries.
- Do not use rechargeable batteries unless you're using a rechargeable (rechargeable) battery charger and replace the batteries properly and regularly.

Includes Codes!

Your Remote

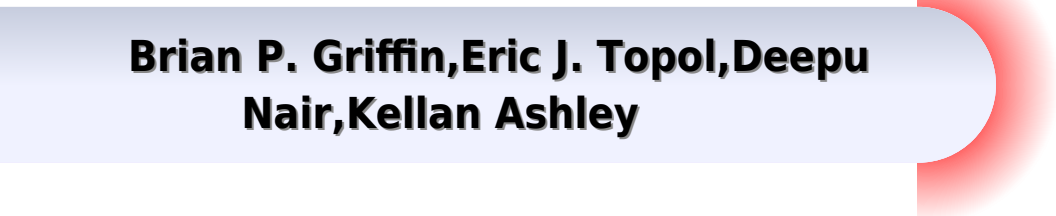

Care and Maintenance

- Keep the remote dry. Do not use the remote in wet or damp environments.
- Handle the remote gently and carefully. Don't drop it.
- Keep the remote away from dust and dirt.
- Wipe the remote with a damp cloth occasionally to keep it looking new.
- Sticking or scratching with the remote's external components can cause malfunctions and void the warranty.

With a variety of brands of components, to make your universal remote to control your components, you need to program the remote with the codes that match the components. The Code List included on page 10 is manufacturer-specific. These codes enable the remote to communicate with your components. Each brand and each component has its own "language," and, by programming the remote codes into your remote, you tell the remote to "speak the same language" as your components.
