Teaching Epidemiology Jørn Olsen, Naomi Greene, Rodolfo Saracci, Dimitrios Trichopoulos, 2015-03-26 Teaching epidemiology requires skill and knowledge combined with a clear teaching strategy and good pedagogic skills The general advice is simple if you are not an expert on a topic try to enrich your background knowledge before you start teaching The new edition of Teaching Epidemiology helps you to do this and by providing world expert teachers advice on how best to structure teaching providing a unique insight into what has worked in their hands This book will help you to tailor your own epidemiology teaching programme The fourth edition of this established text has been fully revised and updated drawing on new research findings and recently developed methods including research technologies in genetic epidemiology and method development in relation to causal analysis Analytical tools provide teachers in the field with the skills to guide students at both undergraduate and postgraduate levels Each chapter in Teaching Epidemiology comprises key concepts in epidemiology subject specific methodologies and disease specific issues to provide expert assistance in the teaching of a wide range of epidemiology courses

Bayesian Statistics for Experimental Scientists Richard A. Chechile, 2020-09-08 An introduction to the Bayesian approach to statistical inference that demonstrates its superiority to orthodox frequentist

statistical analysis This book offers an introduction to the Bayesian approach to statistical inference with a focus on nonparametric and distribution free methods It covers not only well developed methods for doing Bayesian statistics but also novel tools that enable Bayesian statistical analyses for cases that previously did not have a full Bayesian solution The book's premise is that there are fundamental problems with orthodox frequentist statistical analyses that distort the scientific process Side by side comparisons of Bayesian and frequentist methods illustrate the mismatch between the needs of experimental scientists in making inferences from data and the properties of the standard tools of classical statistics

Solidarity in the Media and Public Contention over Refugees in Europe Manlio Cinalli, Hans-Jörg Trenz, Verena Brändle, Olga Eisele, Christian Lahusen, 2021-04-13 This book examines the European refugee crisis offering an in depth comparative analysis of how public attitudes towards refugees and humanitarian dispositions are shaped by political news coverage An international team of authors address the role of the media in contesting solidarity towards refugees from a variety of disciplinary perspectives Focusing on the public sphere the book follows the assumption that solidarity is a social value political concept and legal principle that is discursively constructed in public contentions The analysis refers systematically and comparatively to eight European countries namely Denmark France Germany Greece Italy Poland Switzerland and the United Kingdom Treatment of data is also original in the way it deals with variations of public spheres by combining a news media claims making analysis with a social media reception analysis In particular the book highlights the prominent role of the mass media in shaping national and transnational solidarity while exploring the readiness of the mass media to extend thick conceptions of solidarity to non members It proposes a research design for the comparative analysis of online news reception and considers the innovative potential of this method in relation to established public opinion research The book is of particular interest for scholars who are interested in the fields of European solidarity migration and refugees contentious politics while providing an approach that talks to scholars of journalism and political communication studies as well as digital journalism and online news reception

Linkages Between Financial Variables, Financial Sector Reform and Economic Growth and Efficiency Mr. R. B. Johnston, Ceyla Pazarbasioglu, 1995-10-01 This paper analyzes the different channels through which financial variables and financial sector reform can affect economic growth and efficiency using panel data for 40 countries which reformed their financial systems Financial sector reform is hypothesized to affect economic growth and efficiency through three main channels the real interest rate representing the interest cost of capital the volume of intermediation and financial sector efficiency The results indicate that financial reforms have structural effects that financial variables and reforms are important determinants of economic performance that the impact depends on whether countries did or did not face a financial crisis and that the quality of financial sector reform matters
