HOW DO I SELECT MY SHADE

STEP 1 - Review the shade chart and select the model that most closely matches your own skin tone.

STEP 2 - The color associated with that model is the shade you should select.

PRO TIP - If you think you might be "in-between" shades, choose the **DARKER** of the two shades. For example, if you aren't sure if you are a Light or a Medium, go with Medium.

The Vision Revolution Mark Changizi, 2010-06-08 In The Vision Revolution How the Latest Research Overturns Everything We Thought We Knew About Human Vision Mark Changizi prominent neuroscientist and vision expert addresses four areas of human vision and provides explanations for why we have those particular abilities complete with a number of full color illustrations to demonstrate his conclusions and to engage the reader Written for both the casual reader and the science buff hungry for new information The Vision Revolution is a resource that dispels commonly believed perceptions about sight and offers answers drawn from the field's most recent research Changizi focuses on four why questions 1 Why do we see in color 2 Why do our eyes face forward 3 Why do we see illusions 4 Why does reading come so naturally to us

Why Do We See in Color It was commonly believed that color vision evolved to help our primitive ancestors identify ripe fruit Changizi says we should look closer to home ourselves Human color vision evolved to give us greater insights into the mental states and health of other people People who can see color changes in skin have an advantage over their color blind counterparts they can see when people are blushing with embarrassment purple faced with exertion or the reddening of rashes Changizi's research reveals that the cones in our eyes that allow us to see color are exquisitely designed exactly for seeing color changes in the skin And it's no coincidence that the primates with color vision are the ones with bare spots on their faces and other body parts Changizi shows that the development of color vision in higher primates closely parallels the loss of facial hair culminating in the near hairlessness and highly developed color vision of humans

Why Do Our Eyes Face Forward Forward facing eyes set us apart from most mammals and there is much dispute as to why we have them While some speculate that we evolved this feature to give us depth perception available through stereo vision this type of vision only allows us to see short distances and we already have other mechanisms that help us to estimate distance Changizi's research shows that with two forward facing eyes primates and humans have an x ray ability Specifically we're able to see through the cluttered leaves of the forest environment in which we evolved This feature helps primates see their targets in a crowded encroached environment To see how this works hold a finger in front of your eyes You'll find that you're able to look through it at what is beyond your finger One of the most amazing feats of two forward facing eyes Our views aren't blocked by our noses beaks etc

Why Do We See Illusions We evolved to see moving objects not where they are but where they are going to be Without this ability we couldn't catch a ball because the brain's ability to process visual information isn't fast enough to allow us to put our hands in the right place to intersect for a rapidly approaching baseball If our brains simply created a perception of the way the world was at the time light hit the eye then by the time that perception was elicited which takes about a tenth of a second for the brain to do time would have marched on and the perception would be of the recent past Changizi explains Simply put illusions occur when our brain is tricked into thinking that a stationary two dimensional picture has an element that is moving Our brains project the

moving element into the future and as a result we don't see what's on the page but what our brain thinks will be the case a fraction of a second into the future Why Does Reading Come So Naturally to Us We can read faster than we can hear which is odd considering that reading is relatively recent

True Colors Gry Garness, 2014-01-26 This interactive e-book is named True Colors because it describes what we aim for when we try to produce an image without randomly changing its colours in print or on the internet It centres on how to make the workflow of shooting processing manipulation reproduction to be as predictable and optimal as possible The human factor is central to the book Most mistakes in the colour workflow are made through bad or lacking communication and there's a chapter on Communicating Color not only about human speak but on how colour translates and communicates digitally to analogue output It covers print ink paper light viewing and the many factors within Colour Management that are non-digital

Playing to Lose Kathryn Sunantha, 2016-01-29 An open heart has the quality of fearlessness like a child who dares to play and wonder and has the audacity to question the existing and great courage to make mistakes We have been taught to prove ourselves please others and win all the time but when we actually learn to relax more and not become overly bothered by the need to win or be right we do not lose anything but create bigger space for greater fun sharing and a lot of new learning opportunities in life My spiritual teachers once said Whatever you offer to others belongs to you Whatever you cling on for yourself belongs to others That which you offer turns to gold That which you hold back turns to coal I invite you to play and play full out Simple reflections on education spirituality and health

Cyanotype Toning Annette Golaz, 2021-09-30 Cyanotype is the most accessible and frequently used of all the alternative photographic processes When utilized properly it has the potential to rival other processes when it comes to detail and tonal range but its Prussian blue color isn't always suitable for the final photograph Throughout history cyanotype prints have been toned not only with various and at times hazardous chemicals but also with more natural ingredients like tea and coffee Since the cyanotype itself is non-toxic Cyanotype Toning will champion an innovative process developed by the author of toning cyanotypes with natural material This process which is easy and reliable offers a much broader range of possible colors and even beautiful black and whites Even duotone or tricolor prints can be attained The book consists of two parts Part One is a step by step how to section including all the information that a student at any level needs to achieve a successfully toned print Easy to understand background information is provided on how and why the process works so that readers can venture on their own into the world of natural colors The first part also has a detailed section on all the factors that can influence the outcome like paper choice water quality properties of the plants temperature of the bath and the duration of the toning Part Two is devoted to contemporary artists who have explored toning with botanicals and integrated the process into their creative practice The book includes A list of equipment and supplies needed In depth information about useful plants and the specific properties that make them suitable for toning cyanotypes Concise step by step instructions for printing cyanotypes successfully A chart of more than 60 tested papers with recommendations on paper choice Step by step generic instructions

on toning with botanicals Troubleshooting toning with botanicals More detailed recipes for specific colors with information about the plants Step by step instructions on how to print duotone and tricolor prints A range of creative ideas on how to use the process in classrooms and with different age groups A comprehensive list of more than 380 tested parts of plants and possible color outcomes Using botanicals to tone cyanotypes broadens the color spectrum enlarges creative possibilities and makes the cyanotype process even more versatile The process is not cut and dried science but a limitless field for discovery and surprises Cyanotype Toning provides accessible information and instructions for readers at all levels It is comprehensive and explanatory so that readers can expand on the subject on their own as did the contemporary artists who share their experiences and the works they have created using this innovative toning process *Abstraction in Art and Nature* Nathan Cabot Hale, 2012-06-19 In this stimulating thought provoking guide a noted sculptor and teacher demonstrates how to discover a rich new design source in the abstractions inherent in natural forms Through systematic study of such properties as line form shape mass pattern light and dark space proportion scale perspective and color as they appear in nature students can learn to utilize the infinite variety and diversity of those elements as a wellspring of creative abstraction The author invites students to learn the necessary techniques through a series of projects devoted to exploring and drawing plants animals birds landscapes seascapes skies and more Lines of growth and structure water and liquid forms weather and atmospheric patterns luminosity in plants and animals earth colors and lightning are among the sources of abstraction available to the artist who is aware of them This book will train you to see and use these elements and many more An intriguing blend of art psychology and the natural sciences *Abstraction in Art and Nature* is profusely illustrated with over 370 photographs scientific illustrations diagrams and reproductions of works by the great masters It not only offers a mind stretching new way of learning and teaching basic design but deepens our awareness of the natural environment In short Mr Hale s book is an indispensable guide that artists teachers and students will want to have close at hand for instruction inspiration and practical guidance
