Hazardous and Trace Materials in Soil and Plants M. Naeem, Tariq Aftab, Abid Ali Ansari, Sarvajeet Singh Gill, Anca Macovei, 2022-08-13 Hazardous and Trace Materials in Soil and Plants Sources Effects and Management explores the latest advancements in reducing avoiding and eliminating soil contaminants that challenge the health and safety of agricultural plants With a focus on minimizing the production of those hazardous substances controlling their distribution and ensuring safe utilization the book explores each contributing area and provides insights toward improved sustainable and secure production This is an excellent reference resource on both current research and future directions from laboratory research to field applications The combined impacts of climate change and industrialization have led to increased and diversified threats to the health of the soil in which our food crops are grown as well as in the plants themselves This dual hazard scenario is increasingly recognized as a threat to not just the environment but to global food security as agricultural soils contaminated with pollutants alter plant metabolism thus resulting in reduced crop quality and production quantity Addresses the challenges of mitigating toxic substances in plants including agricultural crops Presents current status and future prospects for managing biotic and abiotic environmental stress factors through plant stress tolerance mechanisms Includes chapters that address both biotic and abiotic stresses agricultural and environmental science toxicology biotechnology nanotechnology and molecular studies Integrates insights and developments between environmental and plant science

Green Magnetic Nanoparticles (GMNPs) Ruby Aslam, Chaudhery Mustansar Hussain, Jeenat Aslam, 2024-05-17 Green Magnetic Nanoparticles GMNPs Recent Developments in Preparation and Application highlights established research and technology on nanomaterials nanocomposites and other alternative materials to be used for different applications and move to their rapidly emerging aspects and then discusses future research directions Nanomaterials and nanocomposites are the most effective materials to be used in different industrial applications Green nanotechnology incorporates the principles of green chemistry and green engineering to fabricate innocuous and eco friendly nanoassemblies to combat problems affecting both human health and the environment It provides academia and industry with a high tech start up that will revolutionize the modern developments in synthesis and applications of green magnetic nanoparticles This book evaluates green magnetic nanoparticles as prime options for smart and transformational opportunities Covers the synthesis characterization properties and applications of green magnetic nanoparticles Highlights the use of green magnetic nanoparticles as revolutionized modern industrial practices Evaluates green magnetic nanoparticles as prime options for smart and transformational opportunities

Fungal Biotechnology Arshad Farid, Gagan Preet, 2025-09-11 This book presents diverse applications of fungi in medical pharmaceutical and environmental sciences It discusses the intricate processes involved in fungal metabolite production bioactive compound discovery and genetic engineering highlighting their critical roles in addressing global challenges such as chronic diseases drug development and environmental sustainability This book examines the growing

importance of fungi in the biopharmaceutical industry including their use in immunotherapy vaccine development and precision medicine while also exploring the novel applications of fungal nanobiotechnology in drug delivery systems The chapters explore challenges in antifungal drug development and food safety particularly regarding mycotoxins and offer practical insights into diagnostic techniques for fungal infections This book also addresses the global regulatory standards for fungal products and the ethical considerations surrounding the advancement of fungal biotechnology

Food and Agro-Industrial Wastes Mika Sillanpää, Moharana Choudhury, Srijan Goswami, 2025-09-26 Food and Agro Industrial Wastes Sustainable Impacts Transformation and Added Value of By Products offers an in depth look at the potential of recycling food and agro industrial waste into valuable products This book presents the concept of sustainable development through responsible consumption and production and introduces practical methods to transform waste into new value added products It delves into various industries such as meat dairy and crop processing highlighting the ways in which residues like leaves stems and husks can be repurposed Moreover the book explores the valorization and safety of fruit and vegetable waste including peels and skins to enhance food products Real life case studies showcase how bioactive compounds nutraceuticals and other bio based enzymes can be derived from waste providing insights into innovative food product development This comprehensive guide is an essential resource for anyone interested in sustainable waste management and the creation of functional eco friendly products Globally it is estimated 1 3 billion tons of food valued at 1 trillion is wasted a year according to the United Nations and the Food and Agriculture Organization FAO In addition billions of tons of agro industrial waste from agriculture and food processing activities are generated yearly putting a strain on natural resources and negatively effecting the environment Addresses sustainable solutions and different valorization methods for food and agro industrial waste Discusses risks challenges safety aspects and opportunities for food and agro industrial wastes within a circular economy Focuses on bioprocessing chemical and biological methodologies synthesis and purification of food and agro food waste Highlights added value and practical uses of products obtained from food and agro industrial waste Demonstrates case studies on bioactive compounds and nutraceuticals derived from food waste

Advances in Mathematical and Computational Modeling of Engineering Systems Mukesh Kumar Awasthi, Maitri Verma, Mangey Ram, 2023-02-20 The text covers a wide range of topics such as mathematical modeling of crop pest control management water resources management impact of anthropogenic activities on atmospheric carbon dioxide concentrations impact of climate changes on melting of glaciers and polar bear populations dynamics of slow fast predator prey system and spread and control of HIV epidemic It emphasizes the use of mathematical modeling to investigate the fluid flow problems including the breaking of viscoelastic jet instability arising in nanofiber flow in an annulus channel and thermal instability in nano fluids in a comprehensive manner This book will be a readily accessible source of information for the students researchers and policymakers interested in the application of mathematical and computational modeling techniques to investigate various

biological and engineering phenomena Features Focuses on the current modeling and computational trends to investigate various ecological epidemiological and engineering systems Presents the mathematical modeling of a wide range of ecological and environmental issues including crop pest control management water resources management the effect of anthropogenic activities on atmospheric carbon dioxide concentrations and impact of climate changes on melting of glaciers and polar bear population Covers a wide range of topics including the breaking of viscoelastic jet instability arising in nanofiber flow in an annulus channel and thermal instability in nano fluids Examines evolutionary models i e models of time varying processes Highlights the recent developments in the analytical methods to investigate the nonlinear dynamical systems Showcases diversified applications of computational techniques to solve practical biological and engineering problems The book focuses on the recent research developments in the mathematical modeling and scientific computing of biological and engineering systems It will serve as an ideal reference text for senior undergraduate graduate students and researchers in diverse fields including ecological engineering environmental engineering computer engineering mechanical engineering mathematics and fluid dynamics
