core of the manual consists of a series of chapters reference guides on various scientific topics each authored by an expert in that field The topics have been chosen by an oversight committee because of their complexity and frequency in litigation Each chapter is intended to provide a general overview of the topic in lay terms identifying issues that will be useful to judges and others in the legal profession They are written for a non technical audience and are not intended as exhaustive presentations of the topic Rather the chapters seek to provide judges with the basic information in an area of science to allow them to have an informed conversation with the experts and attorneys
