Out Of The Mainstream Water Rights Politics And Identity:

Out of the Mainstream Rutgerd Boelens, David Getches, Armando Guevara-Gil, 2010-02-26 Water is not only a source of life and culture. It is also a source of power, conflicting interests, and identity battles. Rights to materially access, culturally organize, and politically control water resources are poorly understood by mainstream scientific approaches and hardly addressed by current normative frameworks. These issues become even more challenging when law and policy makers and dominant power groups try to grasp, contain, and handle them in multicultural societies. The struggles over the uses, meanings, and appropriation of water are especially well illustrated in Andean communities and local water systems of Peru, Chile, Ecuador, and Bolivia, as well as in Native American communities in south western USA. The problem is that throughout history, these nation states have attempted to civilize and bring into the mainstream the different cultures and peoples within their borders, instead of understanding context and harnessing the strengths and potentials of diversity. This book examines the multi-scale struggles for cultural justice and socio-economic redistribution that arise as Latin American communities and user federations seek access to water resources and decision-making power regarding their control and management. It is set in the dynamic context of unequal globalizing power relations, politics of scale, and identity, environmental encroachment, and the increasing presence of extractive industries that are creating additional pressures on local livelihoods. While much of the focus of the book is on the Andean Region, a number of comparative chapters are also included. These address issues such as water rights and defence strategies in neighbouring countries and those of Native American people in the southern USA, as well as state reform and multi-culturalism across Latin and Native America, and the use of international standards in struggles for indigenous water rights. This book shows that against all odds, people are actively contesting neoliberal globalization and water power plays. In doing so, they construct new hybrid water rights systems, livelihoods, cultures, and hydro-political networks, and dynamically challenge the mainstream powers and politics.

Water Security, Justice and the Politics of Water Rights in Peru and Bolivia Miriam Seemann, 2016-04-08 The author scrutinizes the claim of policy makers and experts that legal recognition of local water rights would reduce water conflict and increase water security and equality for peasant and indigenous water users. She analyzes two distinct top-down and bottom-up formalization policies in Peru and Bolivia: neoliberal the former, indigenist socialist the latter. The policies have intended and unintended consequences and impact on marginalized peasants and the complex inter-legal systems for providing water security on the ground. This study seeks to debunk the official myth of the need to create state-centric top-down legal security in complex pluralistic water realities. The engagement between formal and alternative water securities and controversial notions of rightness is interwoven and contested. A complex setting is unveiled that forbids one-size-fits-all solutions. Peru's and Bolivia's case studies demonstrate how formalization policies while aiming to enhance inclusion in practice actually reinforce exclusion of the marginalized. Water rights formalization is certainly no panacea.
