It's Morphing Time: Power Rangers and a New Media Landscape

While some teenagers have to deal with zits, math tests, and asking a crush to prom, others wear colored bodysuits and perform martial arts against strange, extra-dimensional evil. Premiering in the U.S. in the early 90s, *Power Rangers* presented a weird, new form of entertainment, introducing children to martial arts and Japanese culture in the trappings of Saturday morning programming and the after-school special. Despite its often fantastical leanings, *Power Rangers* presented an integral turning point in children's programming and media at large.

Although it presented something new and largely unseen by Western audiences, *Power Rangers* was anything but. All of the action scenes were taken directly from Japan's *Super Sentai* series (specifically *Kyoryu Sentai Zyuranger*), intercut with scenes of an American cast existing within tranquil Angel Grove. The *Super Sentai* series stayed within the traditions of the long-running line of programming known as tokusatsu, meaning "special effects" (a reference to the use of practical special effects).

Transplanting Japanese cultural media and overlaying it upon an American production and audience posed its own challenges, but the almost immediate success came from its own storytelling. At first blush, winding fantastical adventures and impressive martial arts into the everyday lives of American teens (who dealt with bullying, teamwork, and celebrating birthdays) seems disparate. However, the combination led to instantly relatable stories that resonated with children, imparting ideas of community and selflessness through skills and talents of all forms, physical, mental, and emotional.

In conclusion, *Power Rangers* presented an amalgam of different cultural ideas to create a new children's media landscape. The original series has since given rise to ongoing series, along with offshoot books, comics, and other media. For many kids, the show was an introduction to new ideas that were still grounded within the parks, schools, and suburbs of their lives. It was a form of escapism and imagination that stayed within the bounds of a reality that could be cruel, difficult to understand, or full of light. It just took some friends, some martial arts, and the ability to morph into something new.

Brereton,1996-01-15 This volume describes the formative years of English composition courses in college through a study of the most prominent documents of the time magazine articles scholarly reports early textbooks teachers testimonies and some of the actual student papers that provoked discussion Includes writings by leading scholars of the era such as Adams Sherman Hill Gertrude Buck William Edward Mead Lane Cooper William Lyon Phelps and Fred Newton Scott *Composition In The University* Sharon Crowley,1998-05-15 Composition in the University examines the required introductory course in composition within American colleges and universities According to Sharon Crowley the required composition course has never been conceived in the way that other introductory courses have been as an introduction to the principles and practices of a field of study Rather it has been constructed throughout much of its history as a site from which larger educational and ideological agendas could be advanced and such agendas have not always served the interests of students or teachers even though they are usually touted as programs of study that students need If there is a master narrative of the history of composition it is told in the institutional attitude that has governed administration design and staffing of the course from its beginnings the

attitude that the universal requirement is in place in order to construct docile academic subjects Crowley argues that due to its association with literary studies in English departments composition instruction has been inappropriately influenced by humanist pedagogy and that modern humanism is not a satisfactory rationale for the study of writing She examines historical attempts to reconfigure the required course in nonhumanist terms such as the advent of communications studies during the 1940s Crowley devotes two essays to this phenomenon concentrating on the furor caused by the adoption of a communications program at the University of Iowa Composition in the University concludes with a pair of essays that argue against maintenance of the universal requirement In the last of these Crowley envisions possible nonhumanist rationales that could be developed for vertical curricula in writing instruction were the universal requirement not in place Crowley presents her findings in a series of essays because she feels the history of the required composition course cannot easily be understood as a coherent narrative since understandings of the purpose of the required course have altered rapidly from decade to decade sometimes in shockingly sudden and erratic fashion The essays in this book are informed by Crowley s long career of teaching composition administering a composition program and training teachers of the required introductory course The book also draw on experience she gained while working with committees formed by the Conference on College Composition and Communication toward implementation of the Wyoming Resolution an attempt to better the working conditions of post secondary teachers of writing
