Human Factors and Ergonomics in Consumer Product Design

Waldemar Karwowski, Marcelo M. Soares, Neville A. Stanton, 2011-06-22 Every day we interact with thousands of consumer products We not only expect them to perform their functions safely reliably and efficiently but also to do it so seamlessly that we don't even think about it However with the many factors involved in consumer product design from the application of human factors and ergonomics principles to reducing risks of malfunction and the total life cycle cost well the process just seems to get more complex Edited by well known and well respected experts the two volumes of Handbook of Human Factors and Ergonomics in Consumer Product Design simplify this process The second volume Human Factors and Ergonomics in Consumer Product Design Uses and Applications discusses challenges and opportunities in the design for product safety and focuses on the critical aspects of human centered design for usability The book contains 14 carefully selected case studies that demonstrate application of a variety of innovative approaches that incorporate Human Factor and Ergonomics HF E principles standards and best practices of user centered design cognitive psychology participatory macro ergonomics and mathematical modeling These case studies also identify many unique aspects of new product development projects which have adopted a user centered design paradigm as a way to attend to user requirements The case studies illustrate how incorporating HF E principles and knowledge in the design of consumer products can improve levels of user satisfaction efficiency of use increase comfort and assure safety under normal use as well as foreseeable misuse of the product The book provides a comprehensive source of information regarding new methods techniques and software applications for consumer product design
