Model-Based Testing of Reactive Systems Manfred Broy, Bengt Jonsson, Joost-Pieter Katoen, Martin Leucker, Alexander Pretschner, 2005-07-11 Testing is the primary hardware and software verification technique used by industry today Usually it is ad hoc error prone and very expensive In recent years however many attempts have been made to develop more sophisticated formal testing methods This coherent book provides an in depth assessment of this emerging field focusing on formal testing of reactive systems This book is based on a seminar held in Dagstuhl Castle Germany in January 2004 It presents 19 carefully reviewed and revised lectures given at the seminar in a well balanced way ensuring competent complementary coverage of all relevant aspects An appendix provides a glossary for model based testing and basics on finite state machines and on labelled transition systems The lectures are presented in topical sections on testing of finite state machines testing of labelled transition systems model based test case generation tools and case studies standardized test notation and execution architectures and beyond testing

Handbook of Real-Time and Embedded Systems Insup Lee, Joseph Y-T. Leung, Sang H. Son, 2007-07-23 Real time and embedded systems are essential to our lives from controlling car engines and regulating traffic lights to monitoring plane takeoffs and landings to providing up to the minute stock quotes Bringing together researchers from both academia and industry the Handbook of Real Time and Embedded Systems provides comprehensive covera

Model-Based Testing for Embedded Systems Justyna Zander, Ina Schieferdecker, Pieter J. Mosterman, 2017-12-19 What the experts have to say about Model Based Testing for Embedded Systems This book is exactly what is needed at the exact right time in this fast growing area From its beginnings over 10 years ago of deriving tests from UML statecharts model based testing has matured into a topic with both breadth and depth Testing embedded systems is a natural application of MBT and this book hits the nail exactly on the head Numerous topics are presented clearly thoroughly and concisely in this cutting edge book The authors are world class leading experts in this area and teach us well used and validated techniques along with new ideas for solving hard problems

It is rare that a book can take recent research advances and present them in a form ready for practical use but this book accomplishes that and more I am anxious to recommend this in my consulting and to teach a new class to my students Dr Jeff Offutt professor of software engineering George Mason University Fairfax Virginia USA This handbook is the best resource I am aware of on the automated testing of embedded systems It is thorough comprehensive and authoritative It covers all important technical and scientific aspects but also provides highly interesting insights into the state of practice of model based testing for embedded systems Dr Lionel C Briand IEEE Fellow Simula Research Laboratory Lysaker Norway and professor at the University of Oslo Norway As model based testing is entering the mainstream such a comprehensive and intelligible book is a must read for anyone looking for more information about improved testing methods for embedded systems Illustrated with numerous aspects of these techniques from many contributors it gives a clear picture of what the state of the art is today Dr Bruno Legeard CTO of Smartesting professor of Software Engineering at the University of Franche Comte Besancon France and co author of Practical Model Based Testing

Agent-Directed Simulation and Systems Engineering Levent Yilmaz,Tuncer Ören,2009-10-26 The only book to present the synergy between modeling and simulation systems engineering and agent technologies expands the notion of agent based simulation to also deal with agent simulation and agent supported simulation Accessible to both practitioners and managers it systematically addresses designing and building agent systems from a systems engineering perspective

Model Driven Engineering for Distributed Real-Time Embedded Systems 2009 Jean-Philippe Babau,Mireille Blay-Fornarino,Jöel Champeau,Sylvain Robert,Antonino Sabetta,2013-03-01 Model Driven Engineering for Distributed Real Time Embedded Systems 2009 Advances Standards Applications and Perspectives Model based development methods and supporting technologies can provide the techniques and tools needed to address the dilemma between reducing system development costs and time and developing increasingly complex systems This book provides the information needed to understand and apply model driven engineering MDE and model driven architecture MDA approaches to the development of embedded systems Chapters written by experts from academia and industry cover topics relating to MDE practices and methods as well as emerging MDE technologies Much of the writing is based on the presentations given at the Summer School MDE for Embedded Systems held at Brest France in September 2004

Testing Software and Systems Khaled El-Fakih,Gerassimos Barlas,Nina Yevtushenko,2015-11-07 This book constitutes the refereed proceedings of the 27th IFIP WG 6.1 International Conference on Testing Software and Systems ICTSS 2015 held in Sharjah and Dubai United Arab Emirates in November 2015 The 14 revised full papers and 4 short papers presented were carefully reviewed and selected from 42 submissions The papers are organized in topical sections on model based testing test derivation methods monitoring and fault localization model and system testing and real time systems

Cyber-Physical Systems Houbing Herbert Song,Danda B. Rawat,Sabina Jeschke,Christian Brecher,2016-08-27 Cyber Physical Systems Foundations Principles and Applications explores the core system science

perspective needed to design and build complex cyber physical systems Using Systems Science s underlying theories such as probability theory decision theory game theory organizational sociology behavioral economics and cognitive psychology the book addresses foundational issues central across CPS applications including System Design How to design CPS to be safe secure and resilient in rapidly evolving environments System Verification How to develop effective metrics and methods to verify and certify large and complex CPS Real time Control and Adaptation How to achieve real time dynamic control and behavior adaptation in a diverse environments such as clouds and in network challenged spaces Manufacturing How to harness communication computation and control for developing new products reducing product concepts to realizable designs and producing integrated software hardware systems at a pace far exceeding today s timeline The book is part of the Intelligent Data Centric Systems Sensor Collected Intelligence series edited by Fatos Xhafa Technical University of Catalonia Indexing The books of this series are submitted to EI Compendex and SCOPUS Includes in depth coverage of the latest models and theories that unify perspectives expressing the interacting dynamics of the computational and physical components of a system in a dynamic environment Focuses on new design analysis and verification tools that embody the scientific principles of CPS and incorporate measurement dynamics and control Covers applications in numerous sectors including agriculture energy transportation building design and automation healthcare and manufacturing **Runtime**

Verification Christian Colombo, Gordon J. Pace, 2022-07-12 This book provides a hands on introduction to runtime verification which guides the reader from zero to sufficient practical knowledge required to consider and apply it in industry It starts with almost no assumptions on the knowledge of the reader and provides exercises throughout the book through which the reader builds their own runtime verification tool All that is required are basic programming skills and a good working knowledge of the object oriented paradigm ideally Java Drawing from years of the authors real world experience the reader progresses from manually writing runtime verification code to instrumenting monitoring using aspect oriented programming after which they explore increasing levels of specification abstraction automata regular expressions and linear time temporal logic A range of other topics is also explored in the book including real time properties concerns of efficiency and persistence integration with testing and architectural considerations The book is written for graduate students specializing in software engineering as well as for industry professionals who need an introduction to the topic of runtime verification While the book focuses on underlying foundations and practical techniques it additionally provides for each chapter a reading list in the appendix for the interested reader who would like to deepen their knowledge in a particular area

European Guide to Power System Testing Thomas I. Strasser, Erik C. W. de Jong, Maria Sosnina, 2020-06-11 This book is an open access book This book provides an overview of the ERIGrid validation methodology for validating CPES a holistic power system testing method It introduces readers to corresponding simulation and laboratory based tools including co simulation real time simulation and hardware in the loop Selected test cases and validation examples are provided in order to

support the theory discussed. The book begins with an introduction to current power system testing methods and an overview of the ERIGrid system level validation approach. It then moves on to discuss various validation methods, concepts, and tools, including simulation and laboratory based assessment methods. The book presents test cases and validation examples of the proposed methodologies and summarises the lessons learned from the holistic validation approach. In the final section of the book, the educational aspects of these methods, the outlook for the future, and overall conclusions are discussed. Given its scope, the book will be of interest to researchers, engineers, and laboratory personnel in the fields of power systems and smart grids, as well as undergraduate and graduate students studying related engineering topics.
