Paulo Davim,2022-08-29 This book presents select peer reviewed proceedings of the International Conference on Futuristic Advancements in Materials Manufacturing and Thermal Sciences ICFAMMT 2022 The contents of this book provide an overview of the latest research in the area of manufacturing sciences such as metal cutting metal forming casting joining micromachining nonconventional machining and additive manufacturing Some of the other themes covered in this book are metal based additive manufacturing polymer based additive manufacturing hybrid additive manufacturing optimization approach for minimizing GD and error in additive manufactured parts The book will be useful for researchers and professionals working in the field of manufacturing engineering *The Autocar* ,1985 **Perception and Cognition: Interactions in the Aging Brain** Harriet A.

Allen,Katherine L. Roberts,2016-09-13 Healthy ageing can lead to declines in both perceptual and cognitive functions Impaired perception such as that resulting from hearing loss or reduced visual or tactile resolution increases demands on higher level cognitive functions to cope or compensate It is possible for example to use focused attention to overcome perceptual limitations Unfortunately cognitive functions also decline in old age This can mean that perceptual impairments are exacerbated by cognitive decline and vice versa but also means that interventions aimed at one type of decline can lead to improvements in the other Just as improved cognition can ameliorate perceptual deficits improving the stimulus can help offset cognitive deficits For example making directions and routes easy to follow can help compensate for declines in navigation abilities In this Topic we bring together papers from both auditory and visual researchers that address the interaction between perception and cognition in the ageing brain Many of the studies demonstrate that a broadening of representations or increased reliance on gist underlie perceptual and cognitive age related declines There is also clear evidence that impaired perception is associated with poor cognition although encouragingly it can also be seen that good perception is associated with better cognition Compensatory cognitive strategies were less successful in improving

perception than might be expected We also present papers which highlight important methodological considerations that are required when studying the older brain **The Metallurgist and Materials Technologist** ,1981
