Mobbedpercent21 A Survival Guid:

The Multi-Agent Transport Simulation MATSim Andreas Horni,Kai Nagel,Kay W. Axhausen,2016-08-10 The MATSim Multi Agent Transport Simulation software project was started around 2006 with the goal of generating traffic and congestion patterns by following individual synthetic travelers through their daily or weekly activity programme It has since then evolved from a collection of stand alone C programs to an integrated Java based framework which is publicly hosted open source available automatically regression tested It is currently used by about 40 groups throughout the world This book takes stock of the current status The first part of the book gives an introduction to the most important concepts with the intention of enabling a potential user to set up and run basic simulations The second part of the book describes how the basic functionality can be extended for example by adding schedule based public transit electric or autonomous cars paratransit or within day replanning For each extension the text provides pointers to the additional documentation and to the code base It is also discussed how people with appropriate Java programming skills can write their own extensions and plug them into the MATSim core The project has started from the basic idea that traffic is a consequence of human behavior and thus humans and their behavior should be the starting point of all modelling and with the intuition that when simulations with 100 million particles are possible in computational physics then behavior oriented simulations with 10 million travelers should be possible in travel behavior research The initial implementations thus combined concepts from computational physics and complex adaptive systems with concepts from travel behavior research The third part of the book looks at theoretical concepts that are able to describe important aspects of the simulation system for example under certain conditions the code becomes a Monte Carlo engine sampling from a discrete choice model Another important aspect is the interpretation of the MATSim score as utility in the microeconomic sense opening up a connection to benefit cost analysis Finally the book collects use cases as they have been undertaken with MATSim All current users of MATSim were invited to submit their work and many followed with sometimes crisp and short and sometimes longer contributions always with pointers to additional references We hope that the book will become an invitation to explore to build and to extend agent based modeling of travel behavior from the stable and well tested core of MATSim documented here **Mortal Doubt** Anthony W.

Fontes,2018-11-06 The fear of violent crime dominates Guatemala City In the midst of unprecedented levels of postwar violence Guatemalans struggle to fathom the myriad forces that have made life in this city so deeply insecure Born out of histories of state terror migration and US deportation maras transnational gangs have become the face of this new era of violence They are brutal organizations engaged in extortion contract killings and the drug trade and yet they have also become essential to the emergence of a certain kind of social order Drawing on years of fieldwork inside prisons police precincts and gang dominated neighborhoods Anthony W Fontes demonstrates how gang violence has become indissoluble from contemporary social imaginaries and how these gangs provide cover for a host of other criminal actors Ethnographically

rich and unflinchingly critical *Mortal Doubt* illuminates the maras role in making and mooring collective terror in Guatemala City while tracing the ties that bind this violence to those residing in far safer environs **Class Struggle and Identity**

Politics Marc James Léger, 2024-06-03 Contemporary bipartisan politics undermines socialist solidarity by ignoring class issues and pitting advocates of social justice against ethno national chauvinists This guide to the recent wave of woke culture wars provides a radical class analysis and critique of the most popular academic trends around diversity and inclusion radical democracy intersectionality privilege theory critical race theory and decoloniality The book further explains the complexity of today's cultural conflicts by examining how these issues are viewed across the political spectrum including populist and postmodern perspectives Exploring historical cultural political and economic developments since the postwar era this follows up to Identity Trumps Socialism provides the reader with everything you wanted to know but were afraid to ask about the campus wars that have gone mainstream *Rodak's Hematology - E-Book* Elaine M.
